

The New Organ of The Social Credit Party

In Wednesday's edition of The Calgary Herald, an announcement appeared on the front page, stating that negotiations had been completed, whereby that paper would be merged with Social Credit Chronicle, become the official organ of the Alberta Social Credit party, and enjoy the confidence of the government.

When shown this announcement, Mr. Aberhart made the following statement:

"I am very glad indeed to hear this and I trust that all Social Crediters will avail themselves of the opportunity to establish an organ that will give them the news of the day from the citizens' viewpoint."

"This action will help Social Crediters implement the requirements of Major Douglas in his Interim Report regarding the radio station and the press."

"Commenting upon the above, W. M. Davidson, previous owner-publisher of the Calgary Herald, and a former M.L.A. for the province, now residing in Victoria, says:

"When the Alberta Government says basic dividends are the cause of an organ will have little influence upon the public. The transfer of the Alberta into a new factor into the newspaper and political life of the province is a personal place little value on the influence of a purely party organ, devoid of any independence and blindly supporting its party master's device. Canadian people of this generation need of like opinion and there is no other Canadian daily paper which is the mere organ of any political party. As a newspaper man I regard such an association as not conducive to the public interest."

A WELL-DESERVED TRIBUTE

Right Hon. R. B. Bennett in his long public career has had many epithets flung at him, as have many others who have been the target of a political career. But we do not think Mr. Bennett has ever been accused of not having a warm heart within. He has given away not a little out of a personal fortune to persons in need.

An illustration of his traits in this regard lies in the forwarding of other day of a personal \$3,000 cheque to the Junior Red Cross hospital for crippled children at Calgary. This was a Christmas gift for handicapped boys and girls.

Mr. Bennett loves his Calgary and his heart wants to child life. He particularly goes out to child life where it is underprivileged in the struggle of life.

The former prime minister of Canada is revealed as a man of generous impulses. The true Christmas spirit is well illustrated in his gift for crippled kiddies at Calgary. —Regina Leader-Post.

GET-TOGETHER DINNER

One of the high lights of the U.F.A. Annual Convention is always the annual get-together dinner for the delegates and visitors from Wetaskiwin constituency.

At the convention this function will be held at the Coronet Hotel on Friday, Jan. 21, at 6:15 p.m.

A short, snappy program is being arranged, after which it is planned to hold a discussion on the main issue of the convention and in this way to help clarify the thought of the delegates.

All interested people from Wetaskiwin constituency are heartily invited.

Haynes

HAYNES, Jan. 13. The Haynes young people met at the home of Miss Roth on Jan. 3 with about 35 present. A skating party was held until lunch time. A number of names were handed in, and the judges choose the "Karefree Kids". Miss Maggie Roth was declared the winner. The next meeting of the Karefree Kids will be held January 17 at the home of Mrs. Marie Moorhouse, at which Jack Paul's group will entertain.

A wedding of interest to the community was celebrated at the home of Miss Pauline Bascombe of Pine Lake when the bride of Ewen MacDonald, popular young man of this district. The bride was attended by Miss Catherine MacDonald, sister of the groom, while the bride's brother, Alfred, supported the groom. The ceremony was witnessed by the bride's father and mother and also the father and mother of the groom, after which the wedding party returned to the home of the groom's parents, where a wedding dinner was served.

The bride and groom returned to their own home, where a surprise was sprung on them by a chivalry party. The bride spent last year in the Haynes district and their many friends wish them lots of luck in the years to come.

Engineer is Killed When Steam Turbine Explodes at Ponoka

ALEXANDER FOWLER FATAALLY
INJURED WHEN STRUCK BY
PIECE OF FLYING METAL

PONOKA, Jan. 14.—Struck on the head by a piece of metal when a steam turbine exploded while he was working on the draught fan at the provincial mental hospital here at 11:30 a.m. today, Alexander Fowler, 48 years of age, engineer at the hospital, died soon after. He did not regain consciousness.

Decided to hold the post mortem years. He is survived by his widow and 14-year-old daughter here and by his father and brother who reside in Calgary.

Officers Elected At B.E.S.L. Dinner

The Dinner and Annual Meeting of the Lacombe branch of the Canadian Legion took place in the dining room of the Empress Hotel Wednesday night, President F. Riley presiding.

The officers elected for the ensuing year were: S. Puffer, president; Com. Anderson, vice-president; Com. Thompson, secretary-treasurer; executive, Comrades McNab, McNeice, Rankin, Riley, Wilks, Walker, Reid, Grant and Edmunds.

After considerable discussion it was decided to hold monthly meetings in the Town Hall every second Saturday of the month, commencing with February 8.

I. O. D. E. Hold Very Delightful Card Party

Members of the I.O.D.E. were hosts to about eighty guests at a Bridge Party held at the dining room of the Empress Hotel Friday night. After cards a delightful lunch was served.

The lady's prize was presented to Mrs. McCormick, and the gentleman's was captured by Mr. Sweet.

Conveners were Mrs. T. F. Roberts, Mrs. R. L. Humay, Mrs. R. G. Gilman, Mrs. W. P. Pratt, Mrs. Patricia Mayrand, of Wetaskiwin, became the bride of Mr. Clarence Williamson of Lacombe. The bride was attended by her sister, Miss Gladys Mayrand, while the groom was escorted by his brother, Mr. Osborne Williamson.

Rev. Dean W. H. Hagg officiated. Mr. and Mrs. H. J. Ford, Mr. and Mrs. L. S. Walker, Mr. and Mrs. Hale (Blackfalds), Mr. and Mrs. Fitzpatrick, Mr. and Mrs. S. Puffer, Mr. and Mrs. H. S. Trane, Mr. and Mrs. R. Rhind, Mr. and Mrs. Geo. W. Holston, Mr. and Mrs. Halton, Mr. and Mrs. P. W. Pratt, Mr. and Mrs. T. F. Roberts, Mr. W. MacNab, Mr. Gordon, Mrs. N. E. Caruthers, Mrs. D. Gilmore, Mrs. D. Hay, Mrs. J. S. McCormick, Mrs. Brodie, Mrs. E. Marshall, Mrs. Peterson (Ledgale), Mrs. T. J. Dyke (Coronation), Mrs. F. W. Bowtell, Mrs. W. N. McNeil, and Mrs. P. W. Pratt, Mr. and Mrs. E. Scott, Mrs. S. B. Piffman, Mrs. R. L. Ramsay, Mrs. R. G. Gilmore, Mrs. C. E. Gillies, Mrs. Van Wassenhove.

Blindman Valley Co-op Assn. Meet In Spruceville Hall

SPRUCEVILLE, Jan. 13.—There was a moderate attendance at the meeting of members of District No. 2 of the Blindman Valley Co-op Association held in Spruceville Hall Monday afternoon. Mr. Southward was unanimously elected as secretary.

The business of the meeting being to elect a director in place of the late J. B. Crocker, all first stood for a short period in silence as a tribute to the departed member. A short talk was given by Mr. H. R. Crover, president of the association, in which he mentioned that our Board, while in some measure opposed the National Products Marketing Act in the past, as expressed by Mr. Crover in his annual address two years ago, was now very much in favor of the new set-up, and would do all in their power to support it.

Mr. J. B. Crocker was confined to the house for a few days with the grippe.

Constable S. L. Warrior has located a house to reside in and expects Mrs. Warrior down from Edmonton next week.

Inspector Scott of the R.C.M.P. from Vegreville was in Lacombe on a tour of inspection on Wednesday.

Kellough's representative was in town this week spending the company's money in the purchase of a new car at Parks Garage.

Anyone wishing to rent the United Church Hall, please get in touch with Mrs. F. D. Locke. Phone 93.

Bolide Laine was accidentally knocked down by a car and received a nasty cut in the head requiring a few stitches.

Mrs. Greighton, who was formerly Miss Nancy Hamilton, matron of Lacombe Hospital, died Tuesday at Melfort, Sask.

WETASKIWIN TAKES HEAVY END OF 5-2 SCORE

LARGEST CROWD OF SEASON
WATCH LOCAL TEAM PUT
UP GOOD FIGHT

Lacombe dropped a couple of valuable points to Wetaskiwin on Saturday night in a league hockey game played at the arena, losing out by a 5 to 2 score. The loss puts the local team in a tough spot, as it will now be necessary for them to win the two remaining games to qualify in the play-offs. The game was watched by a crowd of over 500, and was fast all the way. Both teams started out with close checking, and defense to test Gleason with a hot shot from close by, but the goalie pulled off a nice save.

This time Lacombe were having the best of the play and had scored a goal when the Wetaskiwin net with repeated shots and only the good work of Gleason kept them from piling up a score. At that, some of his saves were of the horseshoe variety. The visitors gradually got in their stride and started an offensive, but the Lacombe defense, with some good back checking by the forwards, held them out. McLaughlin was pelted and Lacombe put on the power play, but they were unable to score. Wetaskiwin was pulled up for being off side, with three men inside the blue line, and only one defense man to (Continued on Back Page)

WILLIAMSON—MAYREND

A quiet wedding was solemnized at the Pro-Cathedral in Calgary on January 13, when Patricia Mayrand, of Wetaskiwin, became the bride of Mr. Clarence Williamson of Lacombe. The bride was attended by her sister, Miss Gladys Mayrand, while the groom was escorted by his brother, Mr. Osborne Williamson.

Rev. Dean W. H. Hagg officiated. Mr. and Mrs. H. J. Ford, Mr. and Mrs. L. S. Walker, Mr. and Mrs. Hale (Blackfalds), Mr. and Mrs. Fitzpatrick, Mr. and Mrs. S. Puffer, Mr. and Mrs. H. S. Trane, Mr. and Mrs. R. Rhind, Mr. and Mrs. Geo. W. Holston, Mr. and Mrs. Halton, Mr. and Mrs. P. W. Pratt, Mr. and Mrs. T. F. Roberts, Mr. W. MacNab, Mr. Gordon, Mrs. N. E. Caruthers, Mrs. D. Gilmore, Mrs. D. Hay, Mrs. J. S. McCormick, Mrs. Brodie, Mrs. E. Marshall, Mrs. Peterson (Ledgale), Mrs. T. J. Dyke (Coronation), Mrs. F. W. Bowtell, Mrs. W. N. McNeil, and Mrs. P. W. Pratt, Mr. and Mrs. E. Scott, Mrs. S. B. Piffman, Mrs. R. L. Ramsay, Mrs. R. G. Gilmore, Mrs. C. E. Gillies, Mrs. Van Wassenhove.

Three Councillors Retire This Year

Considerable interest is being manifested in the coming election of councillors for the town, which will take place on Feb. 10.

There will be three seats open for contest, as the term of office expires for Councillors H. Hay, A. Dean and B. S. Cameron. Councillors Cameron and Dean have expressed their intention to stand for re-election, but Councillor Hay has definitely decided to retire.

Several townswomen have endeavored to get W. J. Trott to allow his nomination, but he stated to the Globe that "he has not the time to devote to the work, and I feel I have done my duty by acting on the council previously."

Nomination day is February 3, between 11 a.m. and 12 noon.

Around The Town

Mrs. M. P. Fitzpatrick spent a few days in Edmonton this week.

Mr. and Mrs. C. D. Marble entertained informally at dinner on Sunday in honor of Mr. and Mrs. E. McAllister of Edmonton.

Miss Florence Dwan spent the week end in Ponoka.

Mrs. A. T. Couch of Lamy, formerly of Tessa, Saskatchewan, are visiting this week at the home of Miss Elizabeth Pringle. She will leave for home in Okotoks on Saturday.

Mr. J. McCormick was confined to the house for a few days with the grippe.

Constable S. L. Warrior has located a house to reside in and expects Mrs. Warrior down from Edmonton next week.

Inspector Scott of the R.C.M.P. from Vegreville was in Lacombe on a tour of inspection on Wednesday.

Kellough's representative was in town this week spending the company's money in the purchase of a new car at Parks Garage.

Anyone wishing to rent the United Church Hall, please get in touch with Mrs. F. D. Locke. Phone 93.

Bolide Laine was accidentally knocked down by a car and received a nasty cut in the head requiring a few stitches.

Mrs. Greighton, who was formerly Miss Nancy Hamilton, matron of Lacombe Hospital, died Tuesday at Melfort, Sask.

Uncle and niece stood watching the young people dancing at the dance last night. The young people were dancing like that back in the nineties, eh, Uncle?

"Once—but the place was raised."

Rebekah Lodge Holds Installation of Officers

Installation of officers for ensuing year of Lacombe Rebekah Lodge 101, was held on Monday evening, the ceremony being conducted by Miss Eva Shaw, P.N.G., and the following staff: Dep. M. Mrs. E. Mast; Dep. Sec. Mrs. M. Reeves; Dep. Chap. Mrs. M. H. Hagg.

Officers were installed as follows: J.P.G., Mrs. Hattie Reeves; N.G., Mrs. Alma Saunders; V.G., Mrs. Elmir Fystron; secretary, Mrs. E. Ethel Todd; treasurer, Mrs. Lucy Thompson; ward, Mrs. Inez Clarke; Cond. Mrs. Ada Vaughan; chaplain, Mrs. Marjorie Brooks; R.N.G., Miss Eva Shaw; L.S.G., Mrs. Emily Hay; musician, Mrs. Nellie Paulsen; I.G., Mrs. Grace Korsgaard; O.G., C. E. Todd; R.S.V.G., Mrs. Beulah Buch; S.S.V.G., Mrs. Nelson.

Plans were made to hold a supper and social on the evening of Monday, February 10, in celebration of the lodge in 1929.

Following the meeting refreshments were served and a social hour spent.

Curling

In the Lacombe Curling Club knockout contest last Friday on rink won, contesting the final with London's rink.

Rinks skipped by J. Gilmore, Hay, Landon, and McCormick reached the semi-finals.

The following rinks started in the competition: J. Gilmore, A. Campbell, Morris, Tom Pratt, and Hay; Gilmore, Sage, Hay, Wilkes, Taylor, Chapman, Landon, McCormick and Henderson.

The Atlas Cup

Three games each week will be played in this competition, and the result of the three games already played were: Wilkes won from J. Gilmore; Campbell won from Wilkes; and Landon from Campbell.

There was a good crowd at the final of the district series on Friday, everybody reporting a good time.

Miss M. McGeechay has returned home, after visiting her sister in Spruceville.

Bentley News

BENTLEY, Jan. 13. W. R. Woolgar was a Calgary visitor on Thursday last.

The Bentley Midget hockey team were victorious in a game at the Banff Creek rink on Friday last, the score being 4-1.

Mr. P. Slaughter went to Edmonton last week to visit his daughter, Mrs. Storie MacFadyen.

About 15 ratpayers were present at the annual meeting of Oxford School, Bentley, held at the school house on Saturday, January 4. The ratpayers were: Mr. J. H. Hagg, shown to be in good shape. Mr. R. E. Chown was re-elected trustee.

The Ladies' Curling Club opened the curling season last Wednesday evening. Two games were played with the players in masquerade, with Mrs. McLennan and Mrs. McKay as skips of one and Mrs. G. Wright and Mrs. Geo. Gairies, Jr., as skips of the other. The ladies' costumes caused much merriment both to the players and the crowd.

Mr. and Mrs. Bredon of Kingston are the guests of their daughter, Mrs. W. Holmes and family.

Miss Leona Suggett came down from Edmonton on Saturday last, called home by the serious illness of her father, Mr. J. H. Suggett.

Owing to the severe cold there was but a small crowd in attendance at the W.M.S. tea on Saturday last, which was held at the home of Mrs. J. H. Suggett.

Sunset U.F.A. Vote To Continue in Politics

BENTLEY, Jan. 13. The Sunset U.F.A. local held its annual meeting at the home of Mrs. Victor Johnson on Jan. 7. A full house was present and the interest of the U.F.A. in this locality seems better than ever, despite all predictions to the contrary. The meeting favored the U.F.A. continuing in politics.

Mr. A. J. Anderson, president, Vice President, Mrs. J. H. Suggett, and Clifford Day, secretary, were re-elected. Messrs. Andrew Anderson and Ed Hausted, directors. Mr. Harold Bralorne was appointed delegate to the convention. Two new members were enrolled.

The next meeting will be held at Mr. and Mrs. A. B. Hausted's.

Clive

The regular meeting of the United Church Ladies Aid was held at the home of Mrs. C. T. Coote on Thursday, Jan. 9.

Young People's Dramatic Club has been started in Clive under the leadership of Miss N. Young. The first meeting was held last Wednesday night. The officers elected were: Miss N. Young, hon. president; Miss R. Williams, secretary-treasurer; Mr. N. Boddy, president; Miss E. Dittler, Miss A. Sloan, Mr. C. McMillan, committee. Meetings will be held every two weeks.

The annual school meeting was held in the Clive School on Saturday, Jan. 11. Mr. L. W. Dittler was re-elected as member of the school board.

Mr. D. W. Wilson, who has been to the coast for his health, returned home on Saturday.

W. A. Meldrum has sold two carloads of cattle during the past two weeks.

HUMOROUS SKIT IS PRESENTED AT MEN'S CLUB

The Men's Club held their first meeting of the New Year in the Church of the Holy Trinity, with President C. D. Marble in the chair. After a very enjoyable dinner, community singing was indulged in, led by both sides.

Pete Anderson gave a resume of his experiences during his recent visit to Indianapolis where he attended the Students Christian Convention. Mr. Anderson said he was much impressed with the talks of two outstanding speakers, Kawaga of Japan, who is fostering the Christian movement in Japan, and an emissary of peace to the States from that country, and Archbishop Temple from England.

Several members put on a humorous skit, including a meeting of the Town Council, which was much enjoyed, under the direction of Jack Morrison. Those taking part were Gordon Sweet, Laurence Winters, George England, Bert Smith, Stan Wilson, Jack Morrison and Harry Ford.

Lincoln

The annual meeting of the C.C. was held at the home of Mrs. E. Bradley on Wednesday last, when the following officers for the year were appointed. President, Mrs. E. Bradley; secretary, Mrs. C. Carter and secretary-treasurer, Mrs. A. Cartwright. The February meeting will be held at the home of Mrs. E. Bradley.

The young people of the district are busy preparing for a play. The annual school meeting was held at the home of Mrs. E. Bradley on Friday last, everybody reporting a good time.

Miss M. McGeechay has returned home, after visiting her sister in Spruceville.

Lincoln Mutual Tel. Company Shows A Substantial Balance

A meeting of shareholders of the Lincoln Mutual Telephone Co. was held on Jan. 8 at the Lincoln Hall. There was a large attendance, and the secretary-treasurer reported showed a balance of \$219.00 for 14 months operation.

The same directors and officers were re-elected. Those in attendance expressed themselves as highly pleased with the manner in which the venture had been conducted. Mr. Mann, of the Government Telephone office, Lacombe, addressed the gathering and suggested that the company consider taking over two other branch lines.

President J. A. Bradley, Secretary W. L. Ingraham, with E. B. Stewart, were appointed a committee to look into this matter and report back.

Alexandria Chapter Order Eastern Star Installs Officers

Alexandria Chapter of the Order of the Eastern Star held their annual installation of officers on Tuesday evening, the following staff officiating: Installing officer, Mrs. Margaret Mann; marshals, Mrs. Lillian Marshall, and Mrs. Annah Aldwinckle; chaplain, Mrs. Olivia Edmunds; organist, Mrs. Florence Tracey; warder, Mrs. Letty Langrock.

The following officers were installed: Worthy matron, Mrs. Agnes Hagg; chaplain, Mrs. Lillian Marshall; associate matron, Mrs. E. Elizabeth Nelles; associate pastor, Richard Hall; secretary, Mrs. Ruth Thompson; treasurer, Mrs. Beatrice Ramsay; conductor, Mrs. Pretoria Jardine; assos. cond. Margaret Ross; chaplain, Mrs. Jennina MacKenzie; organist, Mrs. Florence Tracey; star points, Adah, Mrs. Gladys MacKay; Ruth, Mrs. Alva Preston; Esther, Mrs. Mabel Hewitt; Maribu, Mrs. Mary Douglas; Electa, Mrs. Sarah Lancaster; warder, Miss Jennie Lord; sentinel, Mrs. Annah Aldwinckle. Refreshments were served and a delightful social hour spent following the meeting.

Gordon Craigen Leaves For Bralorne

Gordon Craigen, who has done such fine work in good this season for the Lacombe Intermediate Hockey team, left on Monday for Bralorne, B.C. (about 60 miles out of Kamloops), where he has been offered steady employment and a chance to tend and for the local team there. Gordon has done some remarkably fine net-minding this season and his team-mates and fans wish him every success. H. E. Todd is to take over Craigen's duties in front of the net for the local team for the present.

Ice Carnival Next Wednesday Promises Many Surprises

Everybody is busy getting their costumes ready for the big 2 in 1 Carnival which will be held on Wednesday, Jan. 22, at the Arena. The carnival for children, 11 years and under, starts at 7 p.m. and continues to 8:30 p.m. Mrs. Doherty will start the children's grand march at 8 p.m. Immediately following this will be the grand masquerade carnival and races for all those over 11 years of age.

Those costumes will be lined up for the grand march at 9 p.m., under the direction of Mrs. Doherty. During the evening a good program of games will be run off, and an exhibition of fancy skating will be given by Dan McKenzie and his class.

Many humorous characters will be portrayed, including the Katzenjammer Kids, depicted true to life by "Happy" Wilson and Mel Cruickshanks.

The rink will be tastefully decorated with colored lights and bunting.

Hot dogs, doughnuts, coffee, etc., will be served at a nominal charge. Many surprises will be in store for those who attend, so don't miss the Carnival.

A stir was raised in business and political circles by the announcement Thursday that Premier Aberhart and Hon. E. C. Manning would address a "secret" dinner gathering of retailers, manufacturers and wholesalers, at which the proposed changes in trade and industry would be discussed. It was announced that at the request of the premier the press would be excluded. W. R. Hogg was known to have once taken up the cudgels in defence of a "free press" and the right of the public to know what was going on behind the scenes in government.

The secret meeting, as it was called, got a large amount of advertising in consequence and when the dinner was held, over 400 persons came to get the inside story.

Two policemen were stationed at the door of the dining room in the (Continued on Page Four)

TRAIN SPEED OF 112 MILES

Four world records for speed were made in the trial run of British Columbia's "Silver Jubilee" streamlined train last year, a record of the record of the run reveals. The maximum speed for the "Silver Jubilee" was 112 miles p.h. The train was hauled by a streamlined steam locomotive, "Silver Link," and consisted of 7 cars with a gross weight of 230 tons.

WORLD HAPPENINGS
BRIEFLY TOLD

A medical device for inducing artificial fevers was reported responsible for short-wave radio interference throughout North America and in some parts of Europe.

Air France, the French international flying company, announced it will open a regular weekly airmail service between France and South America this month.

James T. Howley, of St. John's, an engineering graduate of the Nova Scotia technical college at Halifax, was named 1935 Rhodes scholar for Newfoundland.

The city of Quetta, destroyed by earthquake last May, will be rebuilt on the same site as far as possible, the Indian government announced. The cost is estimated at \$30,000,000.

Official notification was mailed to all municipalities in Ontario advising that the provincial government will tax incomes from and after Jan. 1. The letter is signed by Welfare Minister Croil.

President Roosevelt announced he was calling a North America wild life conference to meet in Washington, February 3 to 7 to work out a program for conservation of wild life resources.

Fernando for Leon Trotsky, called Bolshevik leader, in Norway has been extended until June 18, 1935, in addition to six months to the original visa granted him upon his departure from France last summer.

Henry Pidgeon of Los Angeles, 60-year-old "hermit of the sea," reached Durban Bay, Dec. 29, in a five-ton yawl after sailing alone half way around the world. He left Los Angeles in August, 1934, heading across the Pacific.

The executive committee of the National Miners Union of Scotland, representing 57,000 men, approved the recent decision by the Miners' Federation of Great Britain calling for a nation-wide strike unless demands for a wage increase are granted.

New Palestine Council

Government Issues Statement Giving Commissioner Wide Powers

The government at Jerusalem issued an official communique proclaiming the establishment of a legislative council, and entrusting Sir Arthur Grenfell Wauchope, high commissioner for Palestine, with wide veto powers over the new assembly. The communique stated that if any section of the Palestinian population refuses to participate in the elections of members of the council, the high commissioner is empowered to nominate British officials or other representatives to sit on the council. This clause was considered of unusual significance in view of the rejection by Jewish leaders of the government's proposals, and in view of a statement by Dr. Chaim Weizmann, president of the World Zionist organization and the Jewish Agency for Palestine, that the Jewish community would not participate in the establishment of the legislative council.

New Ship Being Tested

To Determine Whether New Metal Is Equal To Steel

The Alumette, experimental ship "Fragment" built of aluminum alloy and launched at Bath, Maine, left port on its first trip—by rail. The cross-section of a ship was assigned to the experimental division of the Aluminum Company of America at Newport News, Va. The chief purpose of tests planned there was to determine if the weight-saving metal would resist corrosion as well as steel. The craft's sponsors believe that if the tests are successful, the use of the metal as a hull material would revolutionize shipbuilding and bring a new speed era to the sea.

Common Remembrance

Britain And Germany Agree On Maintenance Of War Graves

The agreement signed at Berlin calling for common remembrance of the war dead by the former belligerent countries in the Great War provides that the 6,500 British dead in Germany shall for all time be left to rest there.

Their graves will be maintained by British personnel in accordance with British principles. Similar arrangements are made for German graves in France and British soil.

Man Of His Word

A Scot from the remote Highlands paid his first visit to London during the Christmas holidays. Arriving at Euston, the first words he heard were: "Taxi, sir?"

Donald spoke his head. After exploring London the Scot proceeded to Bristol. Emerging from the station, he heard the familiar hail, "Taxi, sir?"

"No, thank you," he bawled. "I said 'No' in London, and I meant it. Now stop following me about."

"Johnny," said the minister, "every time I hear you swear a cold chill runs down my back."

"Gee," said Johnny, "if you had been at my house the other day when I had caught his nose in the clothes wringer, you'd have froze to death."

Durum Wheat

Sixteen Million Bushels Grown In Canada This Year

Canada's production of Durum, the great macaroni wheat, is increasing. Upwards of 16,000,000 bushels of Durum were grown in Canada this year, chiefly in Manitoba and Saskatchewan where, because of drought and rust, the growing of Marquis wheat proved unprofitable. Fifteen years ago inspections of Durum wheat in Canada totalled only 88,000 bushels.

Durum wheats, such as "Mildum," according to the national research council, are not so susceptible to injury by drought or the more common forms of rust which affect the bread wheats. Durum is never used alone in the manufacture of bread, but as a wheat for making pasta products, such as macaroni, spaghetti and kindred commodities, it is unexcelled.

With the growth of Durum production in Canada is recorded a doubling of macaroni production in the past five years. In 1930, 16,800,000 pounds of macaroni were made in Canada. Last year this had jumped to 32,200,000 pounds. Macaroni exports from the Dominion jumped from 73,500 pounds in 1930 to 4,780,000 pounds last year. Of the macaroni produced nearly three-quarters found a market in the United Kingdom. The greater part of the remainder went to New Zealand and Japan.

But only about 10 per cent. of Durum wheat sales go into macaroni production in Canada. Great Britain and the United States import the larger part of Canada's Durum production for manufacture within their borders.

Establishment by the national research council at Winnipeg of a special laboratory helped to satisfy a growing demand for accurate information in respect to Durum and other new varieties of wheat. A program of Durum research was undertaken some time ago, and a miniature Durum mill and macaroni plant built.

Scattered across Canada there are now 16 plants making macaroni. The money invested totals approximately \$2,000,000.

Among The Leaders

Over 13,000 Vessels Brought Cargoes To Vancouver In 1935

A great merchant navy fleet of big and little ships, more than 13,000 strong, has been bringing its cargoes of goods and supplies to Port of Vancouver in 1935, almost unnoticed. And yearly the fleet grows in size, world-importance, and cargo value in and out of this great Canadian all-year port.

For the first nine months of 1935, the high commissioner is empowered to nominate British officials or other representatives to sit on the council. This clause was considered of unusual significance in view of the rejection by Jewish leaders of the government's proposals, and in view of a statement by Dr. Chaim Weizmann, president of the World Zionist organization and the Jewish Agency for Palestine, that the Jewish community would not participate in the establishment of the legislative council.

Expectations are that total figures for the full calendar year will exceed any since 1931. The belief is substantiated by figures issued by the minister of national revenue at Ottawa. They prove that Canadian ports, for the first six months of the present fiscal year, April 1 to Sept. 30, have improved their position, and that Port of Vancouver is among the leaders.

Accepts Challenge And Wins

Woman, 95, Victor In Hike With Six-Foot Blacksmith

When Lambert McNayer, a 6-foot, but rheumatic blacksmith, of Lake Pleasant, Nova Scotia, coaxed his little 95-year-old mother-in-law, Mrs. Mathilda Durling, who celebrated her birthday at her home there, into going on a hike with him in order that her prowess as walkers might be determined, his miscalculated the ability of the bright-eyed, rosy-cheeked little lady. Other members of the family, keenly interested in the impending race, assisted the aspiring contestants to don suitable apparel and provided each with a walking stick.

When all was ready the starting signal was given and the pair were off. Hobbling painfully along Mr. McNayer endeavored to keep abreast of his competitor, who, putting her best foot forward, stepped out bravely, despite her years. Finally, leaving him behind, she reached the goal set, amid the shouts and cheers of her delighted grandchildren, who witnessed the race, and roundly applauded the winner.

Seed Testing

Many Saskatchewan farmers are sending samples of their seed grain to the Dominion Seed Branch at Saskatoon for testing. Because of the large number of samples being received at the seed laboratory the results of a germination test should not be expected for at least a month after the samples have been mailed.

Victim Of Science

Dr. William C. Kruess, 74, one of the first physicians in the southern United States to foresee the importance of the x-ray in the field of medicine and surgery, is dead, at Memphis, Tenn., a victim of the science in which he pioneered. He died of a cancer resulting from x-ray destruction of tissue of his left hand.

Water drunk immediately after the eating of candy and other dry sugars is an aid to digestion, according to recent tests.

A Vast Building Scheme

Public Development Planned By Several English Towns

With the development of fast automobiles and paved highways and the inauguration of fast express trains between London and the coast, business men think nothing nowadays of making their homes 25 to 50 miles from the city and commuting to and fro every day, making the journey in about the same time as they used to do when they lived in suburban London and took an hour to reach their offices and workshops.

Working on the Sussex coast is 60 miles from London and in the centre of a cluster of small towns on the Channel. In recent years the populations of these delightful places have grown at a tremendous rate. Working alone adding 3,000 a year, and within the last six months 1,900 new homes have been completed. The result is these places have cooperated to embark upon one of the most gigantic schemes of public development ever devised. Contracts have been signed for the purchase of adjacent lands at a cost of \$75,000,000, and upon them will be erected tens of thousands of houses, all laid out according to the most modern system of town-planning, with the last word in recreational facilities.

The project will provide work for 2,000 men for the next 25 years, besides giving employment to thousands of other workers in the building supply lines in other parts of the country.—St. Thomas Times-Journal.

British Empire Exposition

Vancouver Proposes To Hold Big Fair In 1938

A British Empire exposition in Vancouver in 1938 is envisaged by Mayor McGee, who explains it would attract a number of visitors from San Francisco, where a world's fair celebrating completion of the San Francisco bay bridge will be held the same year.

On his return from Ottawa, where he attended the Canadian mayors' conference, Mayor McGee said: "I succeeded in placing Vancouver's tourist opportunities before the prime minister, Hon. C. D. Howe, minister of railways, Hon. William Laidlaw, minister of trade and commerce, and Hon. C. A. Dunning, finance minister."

"I placed before them the advisability of developing our golden jubilee celebration next year as a preliminary to the holding of a British Empire exposition in Vancouver in 1938. I explained that in 1938 San Francisco was holding a world's fair, the completion of the San Francisco bay bridge by holding a world's fair, similar to the Chicago exposition."

Trade Bureau For B.C.

Will Co-operate With Trade And Commerce Department At Ottawa

The British Columbia government plans to establish a trade and commerce department which will co-operate with the trade and commerce department at Ottawa with a view to endeavoring to assist industry. Premier Phelan announced in a public address.

Such co-operation would avoid overlapping, the premier said, and by working in conjunction with industry, opportunity would be afforded to expand present trade as well as open up new avenues of endeavor. The premier announced, also, it is the government's intention to re-organize and re-vitalize the provincial bureau of information to make it more effective in furthering tourist traffic. He stated the government proposes to give financial assistance and co-operation to the Vancouver jubilee celebrations this year.

Record Gold Production

Increase Of Nine Per Cent. For First Ten Months Of 1935

Gold production from Canadian mines in October established a new high monthly record with a total output of 301,712 ounces, compared with 280,362 ounces in September and 265,709 ounces in October a year ago. Canada's total gold production during the first ten months of 1935 amounted to \$2,679,984 ounces, an increase of 9 per cent. over the corresponding period of 1934. The average price of gold on the New York market in Canadian funds in October was \$35.49 per ounce, at which price the Canadian output during the month was worth \$10,707,759. During September gold averaged \$35.28 per ounce and the Canadian output was valued at \$9,891,171.

Concerned About Economics

This to-day may be said with truth—Canadians to-day are thinking in terms of economics, not of politics. They are not much interested in politics. They are gravely concerned about economics. They want to know where the next meal is coming from and how it is going to be paid for, says Country Life in B.C.

Parchment for writing material came into use when an Egyptian pharaoh said that no more papyrus could be sent to Pergamon, in Asia Minor.

Philadelphia permits Sunday movies now. If that city gets any wickeder, its inhabitants will never have to go to New York at all.

"I can't follow my diet. If I take macaroni it will cause complications with England."

Overcoming Obstacles

Creating Nation-Wide Demand For New Product By Advertising

The English Channel was too wide for Napoleon to cross. All he could do was to stand on the French coast and look through a telescope at the white cliffs of Dover.

To cross the Channel was a three-hour journey by sailing-ship, with a good breeze. Then came the first steamships that crossed in an hour.

To-day, the aeroplanes flash across in 10 or 12 minutes. The aeroplane pilots never speak of the "Channel." They call it the "Ditch."

So there are many obstacles in the business world that have shrunk since efficiency became known. It is now possible, for instance, to create a nation-wide demand for a new product in one day, through the use of advertising.—Efficiency Magazine.

After Long Sleep

Railway Employee In England Awakens After Sleeping Four Years

Awakened from a four-year sleep, Victor Cleave of Folkestone, England, he and his family would celebrate what his friends call his "coming back from the dead." Cleave, a railway employee, who was suffering from shell shock, began to doze over his meals in 1931. "Then he fell asleep," doctors, unable to rouse him, had to inject nourishment into his body.

Waking recently, Cleave did not recognize his own children. "I had no dreams, no thoughts, no feelings," he explained. "The four years have been no more than a blank in my life."

He has returned to his cottage home, after long confinement in a hospital.

Work Of The Lifesboats

Crews Have Saved 64,335 Lives Since Institution Started

Totals of 354 lives saved last year and 394 lives saved in 1935 up to the middle of December were among the figures given at the annual meeting in the city chambers of the Edinburgh, Leith, and Granton Branch of the Royal National Lifesboat Institution. From its beginning the crews of the Institution have saved 64,335 lives from shipwreck. Edinburgh's contribution to the work during the past year, it was brought out, has been a very good one, with an increase of over 5500 in subscriptions and donations. Three new motor lifeboats were added to the fleet in Scotland during the year.—Edinburgh Scotsman.

If you sit down as soon as the cold weather arrives and hope for spring, you are not as young as you used to be.

Illinois, Missouri, Ohio, Pennsylvania and Texas combined contain more than one-fourth of the 23,930 high schools in the United States.

Snow never falls on 70 per cent. of the earth's surface.

The visitor who hasn't time to take a chair usually stays an hour.

Origin Of Term Carat

Carat derives its name from quartz, which in Arabic signifies the pod of the coral tree of Abyssinia, the seeds of which have from time immemorial been used in the east in weighing gold because they never vary in weight when they are dry.

Dress Up In Crocheted Neckwear

Make one frock look like three with as many daintily crocheted collars and a pair of lovely cuffs. The collar and cuff set, at top, requires just a bit of white or tinted net or georgette, set off by a border of crocheted medallions. Picture a second change using the lace scarf which, done in cotton, equals a well-known design for its two ends. Equally simple is the collar with perky bow and square sailor peak in cotton—it's what a tailored frock needs for that light, feminine touch. In pattern 5288 you will find complete instructions for making the collars shown; an illustration of it, of the stitches needed; material requirements and color suggestions. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Women Worked On Railroad

Construction Camps In Russia Made Up Of Convicts

A new, strategically-situated railroad through 1,365 miles of the Soviet Far East has been completed after two years of night and day work by convict labor, it was announced at Moscow.

Paralleling the trans-Siberian railroad, also owned by the U.S.S.R., the new railroad runs from Karyn, near Chita, north of Mongolia, to Khabarovsk in far eastern Siberia.

It passes through a zone considered of great military importance due to the alleged threat by Japanese and Manchukuoans of occupying the nearby Mongolian people's republic.

The published account of the two-year task said the construction camps were, in effect, immense reformatories where convicts were reformed by the great patios of their task. The workers were fed, the account stated, in proportion to the labor they performed.

Many work brigades, said this report, consisted entirely of women, while others, made up of men, were headed by women.

An example of the conditions the workers had to face was given in the same paper, which said: "The workers became veritable heroes, often working up to their waists in icy water."

Daring Night Raid

Spies Suspected Of Seeking Plans Of New British Aeroplane

News of a daring night raid by suspected spies, making secret data on a new all-metal British aeroplane being built at Gravesend, stirred the country as an intensive manhunt was launched by Scotland Yard.

At dawn the night sentry of the Gravesend army airport, making his rounds, noted the doors of one of the hangars were open.

He entered the hangar and confronted a man of about 30. A furious fist fight ensued but it ended abruptly when another man, apparently an accomplice of the spy suspect, rushed up from behind and dealt the sentry a stunning blow with a club.

The sentry fell unconscious. When he regained his senses he gave an alarm and Scotland Yard and other police authorities immediately launched a search.

The suspected spies, it was believed, were seeking the plans of the new secret all-metal ship. The plans are kept elsewhere.

Sacrificed His Job

Young Man Figured Other Applicant Needed It More

The following article by Leonard Lyons, appeared in New York Post: "Few, except the Employment Departments of radio and advertising offices, know Spencer Hare. After a three-year search for employment, Spencer finally got a job—with a Radio Publicity Service. Many had applied, but only two survived the eliminations; and of these two, Spencer was selected. The other applicant was a young man, too. He didn't know that he had lost out. 'I've been waiting two years to be married,' the other man told Hare. 'And if I get this job... Gee—we're gonna be a happy couple.' Spencer phoned the man who would have been his new boss. 'I don't want the job,' he stated. 'Just get a better offer. Give it to the other guy.' It was a gallant gesture—especially since the lady who was engaged for three years to Spencer Hare had broken the truth the week before—because he couldn't find employment."

Latest to announce plans for North Atlantic airmail and passenger service in 1936 is the German Lufthansa Company, which declared a regular service would be inaugurated via the Lisbon-Azores-Bermuda route.

Germany's bid for passenger travel will be made on the new Zeppelin LZ 129 and her sister, still under construction, the LZ 130. First trials of the LZ 129 will be held next month.

Although the southern route, as planned for the Lufthansa mail planes, is 1,875 miles longer than the Ireland-Newfoundland route, the weather conditions are more favorable and it has the advantage of possessing natural landing points, in the Azores and Bermuda.

Instead of using huge seaplanes, Lufthansa will rely on small and very swift planes, refueled at various points from vessels at anchor.

Improvement In Building

Canada Leads The World In Building Industry Gains In 1935

Canada led the world in improvement in the building industry during the first 10 months of 1935, as compared with the corresponding period of 1934, according to the monthly statistical bulletin of the League of Nations.

Canada's increase was 91 per cent. Next came Australia, with a 50 per cent. increase, and the United States with an increase of 45 per cent. The United Kingdom's increase was 17 per cent.

The bulletin showed general improvement in other industries as well as building. Industrial activity in Canada increased nine per cent. over the same 1934 period.

The leading increase was shown by Russia, 20 per cent. Italy followed with 19 per cent. The United Kingdom figure was seven per cent.

Skipped Long Distance

Australian Enthusiast Thinks He Has Proved It Good Exercise

A skipping enthusiast of Sydney, Australia, skipped 600 miles. His journey was from Melbourne to Sydney along the Hume Highway. He estimates that he skipped about 800 turns to each mile, and about 472,000 turns for the journey. He wore out five skipping ropes, but used only one pair of shoes. Three cyclists carried food and clothing for him. He undertook the feat to demonstrate the value of skipping as an exercise. He had allowed 35 days for the journey, but completed it easily in 28 days.

A May fly's adult life lasts only from evening to dawn. Blood is used to make some types of unbreakable buttons.

Foot Quicker Than Eye

One Explanation Of Secret Of Hindu Firewalkers' Art

"The foot is quicker than the eye," was suggested as the secret of the Hindu firewalkers' art.

It may explain why Oriental "men of faith" can walk over red hot coals without burning their feet, Dr. R. Plato Schwartz, of Rochester, N.Y., said in a letter to the Journal of the American Medical Association, Chicago. The letter referred to the exploit of a Hindu named Kuda Bux who performed in London, Eng., and invited physicians to watch him. What surprised the physicians most was that a piece of court plaster put under the arch of Kuda Bux's foot was not scorched.

Dr. Schwartz said this seemed "not necessarily remarkable."

He had studied the human gait for a number of years, he said, and records of 2,000 individuals showed the feet of the average person walking at normal gait bear the weight of the body for only .05 of a second between the time the toe and the heel touch the ground.

He said the sole of the foot bears the weight only .05 of a second and that there may be no interval of time at which the entire plantar surface (or sole) of the foot is bearing weight.

Doctor Schwartz said it was "reasonable to believe" the trained fire-walker elevates the heel and arch of his foot, "assuming the position of a toe-dancer or as when one is sprinting."

"It seems reasonably possible that the position and time interval in which this particular individual brought his feet in contact with the hot embers was not such as to produce evidence of blisters."

"It should be remembered also that Kuda Bux was highly trained in this particular feat. His reactions were correspondingly suited to prevailing conditions."

A Money King

Wealthy Indian Prince To Celebrate Silver Jubilee

Croesus of the world's money kings, the Nizam of Hyderabad expects to celebrate his silver jubilee next month.

As premier prince of India and according to the ancient tradition of his house, the Nizam must feed the poor on festive occasions. So he has ordered the slaughter of 1,000 oxen, sheep be slaughtered and roasted for the jubilee.

The Nizam has 50 marble palaces, and on state occasions rides in a coach of solid gold. But for private use he prefers a vehicle of 1927 vintage.

"He lives in almost spartan simplicity," said Sir Akbar Hydari, minister of finance. "Money has no meaning for him, although he knows how to manage it well."

The Nizam, who rules over 14,000 subjects, has an income estimated variously from \$2,500,000 to \$50,000,000 a year, and in his underground vaults, in "Midan dungeons" deep below his palace, he reportedly has \$250,000,000 in gold bars stowed away—and an estimated \$2,000,000 worth of precious stones, mostly diamonds and rubies.

Expel Soviet Members

Joseph Stalin To Get Rid Of Ten Per Cent.

Joseph Stalin and other leaders of the Communist party of the Soviet Union have decided to expel another 10 per cent. of the party membership, it was announced at Moscow.

Pravda, organ of the party, explained most of the members being expelled were formerly in the armies of the White Russians who fought the Bolsheviks in the civil war in 1920-22. Adherents of Admiral Kolchak, who set up a counter-revolutionary regime in central Siberia at that time, form an especially large proportion of the members affected by the expulsion order.

This new party cleansing has been under way ever since the announcement was made early this year, shortly after the assassination of Sergei Kiroff, Stalin's right-hand man, that the party would be "purified" by membership card control.

Kiroff was assassinated, not by a "White Guard," as was reported at the time, but by a young member of the Communist party. This act was followed by the execution of more than 100 men who were held on various charges in Soviet prisons. A new "party purge" then was ordered.

New Post For Air Pilot

Pioneer of northland flying and one of Canada's ace airmen, W. R. "Wop" May will take over the duties of superintendent of Mackenzie River district, Canadian Airways Limited, succeeding C. H. "Buddy" Dickens who has been promoted to Winnipeg. It has been announced at Edmonton.

Milk Bars A Success

Milk bars have proved so successful in Scotland that several large firms in Glasgow, Edinburgh, and Aberdeen are planning to develop chains of bars. Both hot and cold weather drinks are to be prepared.

A physician has found a way to capture ultra-violet rays in vaseline, which he claims increases the jelly's healing properties.

FLEMING'S FOLLY

-BY-
LAWRENCE A. KEATING

CHAPTER III.—Continued

A few drops from a new bottle of whisky brought her slowly around. Sheriff Stephen stood with Deputy Hatz and the prisoner, his expression grim. Doc Slater watched Townsend, who still lay unconscious. "Sheriff, here's the bullet. It was a splendid shot at such close range. Would have killed him sure, only it deflected from his belt buckle and used up some of the force. Got to leave him here a couple of hours, then move him to a bedroom."

"There's one right handy on this floor, Doc," Gaines offered.

"All right. We'll go now. Move the whole lot."

Eager hands grasped it and slowly worked the leather affair down a short corridor. Gaines led the way. When everything was arranged to the doctor's satisfaction he shook them from the room.

Link walked slowly back to the lobby. Stephen beckoned to him with a lean forefinger and a nod. Helen Hamilton sat with her face covered by both hands, weeping softly. Buzz had the dazed look of a drunk suddenly sobered by the awful consequences of his act.

"Meant that slug for you, eh, Link?"

He hesitated. To admit this might mean a charge of attempted murder against young Hamilton. Hurriedly he sought some possible explanation, and shook his head. "Oh, I guess it was just an accident, Sheriff."

"No, it wasn't an accident! Saw the hull thing myself from the side-walk. Any fool could tell you we haven't words. Buzz tried to kill you. Townsend stepped in and took the slug, trying to get Hamilton's gun. Yuh got a generous streak in yuh, Link," the sheriff said not quite so harshly, "but I'll get Townsend's story so yuh ain't gonna hold yuhself, savvy? Doc, is the boy going to live?"

Slater was replacing the instruments in his bag. "If he does it won't be Hamilton's fault. I'm going to camp right here all night and tend Buster."

The Boone County lawman grunted. With a yank at Buzz's manacles he started his prisoner out to go to him, but was restrained by Roper Kilgo. The next moment, Stephen and Buzz were gone.

For a moment Link Fleming was not sure what he wanted to do. As he stood building a brown-paper cigarette with fingers that trembled, his eyes met those of the girl. Link walked slowly toward her, trying to summon some comforting thing to say.

It was Kilgo who spoke first. "Yuh shouldn't have bailed him, Link. I saw there'd be trouble right off. Buzz, he wasn't feeling right, an'—"

"He wasn't feeling right because he had too much liquor!" Helen interposed with sorrow and accusation blended in her voice. "Who has he been drinking with? Who?" she insisted.

"Wall—reckon him'n Jackpot Mell—"

Her angry gesture stopped him. Kilgo stared down at his boots. "Gosh, I'm shore sorry this happened. Anyhow, it's lucky yuh got somebody yuh can depend on. Me bel'n' kind of like yuh—I mean, since we have a sort of understandin', and I waited two years for yuh to come back, why I guess it's up to me to help you out now. Maybe we better start for the spread, eh?"

The girl drew away the hand he held. In her manner there was coldness unmistakable, freezing to anyone but the obstinate Kilgo. "Jackpot Mell is one of your closest friends. You claim to be a friend to Buzz and me. You convinced Buzz that it would be foolhardy to go into any irrigation scheme, yet he wrote me last week that you wanted to buy our nine hundred acres. If it is wasteland, and you don't believe in irrigation, how is that?"

"I—I think you are responsible, some way, for this thing happening," she continued, "and I want to hear hard to make steady. It's very plain, Mr. Kilgo, that you have entirely too much influence over Buzz. You could have stopped him just now but you were silent. Or rather, you egged him on. We all know he is weak!"

"Thank you," she summed up firmly. "It won't be necessary for you to see me home. Good-bye."

During her speech the Box 50 owner simply looked at her in amazement, his mouth opening and closing stupidly. Roper flushed as she ended, and his jaw set with a click. "So Fleming's been fillin' yuh with a pack o' lies about me gettin' Buzz drunk?"

"We haven't had time to discuss you or anyone else!" Link stated.

The other straightened aggressively. "No, but yuh been writin' love letters when yuh know damn well Helen and me are—"

She stepped between the stern-faced men. "There is no cause for assuming that Mr. Kilgo. Please go!" He waited a moment longer as if

undecided whether to refuse. The girl in the man's small chestnut coat stood, upon Fleming was conscious and vengeful. At last he turned his big bulk to start away, but paused.

"Fleming, you're the cause of all this. Buzz never liked yuh, and I never liked yuh. That fool irrigation scheme is the greatest thing I've heard of in years. I offered to buy that nine hundred acres of the Triple H just to help out, bel'n' as Buzz is hard up for cash. And another thing," he snapped angrily. "I don't care for interloping with my private affairs, savvy?"

He hesitated as if debating whether to amplify this. His meaning was clear, however—that Link had come between him and Helen Hamilton. Finally, with a growl, Roper stamped to the lobby door and was gone outside.

For the first time Fleming became aware that darkness was fast descending as the November afternoon wended into night. Far down the street, but within where he stood at the lobby window, a knot of curious citizens loitered outside the small adobe jail. They were discussing, no doubt, the incarceration of Buzz Hamilton.

Link went back to the bedroom and talked a moment in low tones to Dr. Slater. The practitioner promised to give Buster Townsend every care, and to remain at his patient's side all during the night. He would send word in the morning how Buster was or Link would, if possible, come to see his faithful rider.

Returning to the lobby, he stood before Helen, his hat turning slowly between his fingers. "I'd sure like to take you home if you don't mind. But if you don't, I'll wait here, yuh'll like to be alone, sort of."

She dabbed her eyes with a mile of handkerchief and looking up at him, managed a brave, wan smile. "Thank you, Link. I'd be glad if you would go with me. Shall we start now?"

CHAPTER IV.

The ride to the Triple H Ranch was uneventful. Driving the buckboard Buzz had brought to town for his sister's baggage, Fleming made little effort at conversation, feeling that Helen Hamilton preferred to be left to her thoughts. Much had happened to mar the happiness of her homecoming. Almost before she had had an opportunity to greet her brother he became the sheriff's prisoner for attempting to kill a man. If Buster Townsend succumbed to his wound, Buzz would have succeeded, although his fury had been directed at Fleming.

Link turned the equipage over to a waddle who appeared, and made ready to mount his buckskin pony which had been joggling behind the buckboard. They stood in a shaft of yellow light from one of the front windows of the ranch house. Some what awkwardly, he shook hands with the girl and turned to mount.

But she stayed him with a thoughtful question. "You are really serious about building an irrigation dam, aren't you? I mean, you'll try to water your own spread whether other ranchers go in with you or not?"

He nodded soberly. "Maybe every one else is right on this, and I'm plumb foolish. But I believe in it. Helen, I've learned as much about irrigation as a layman can. Why, I know it'll work."

He grew reflective. "I was sure surprised when Soak Torney said irrigation wouldn't pay here in the country. Soak's a good fellow, but I'm positive. He's been almost as eager for it as I have. Spent a lot of time makin' those blueprints and stayin' nob' enough to talk about it. Yesterday he was all for it. To-morrow he's changed his mind. Somebody talked to Torney, bought him off. Or maybe threatened him. He shook his head. 'Don't know who did it or how, but it sure worked. He seems to have disappeared now.'"

The girl said nothing for a moment as she gazed across the range bathed in early evening moonlight toward the bulk of the Captain Mountain. "Buzz didn't favor irrigation, ever, did he?"

"Oh, first time I mentioned it to him, he was just stand-offish. But right after that he got dead set against it. Why?"

She shook her head. "Who has Buzz kept company with lately? Does he spend much time with Roper Kilgo?"

Fleming moistened the edge of his cigarette paper and carefully shaped the smoke. "Course, Roper's about the most important cattleman around. He's practically boss here. I reckon it's natural for Buzz to kind of snatch up the pearls of wisdom Kilgo drops about rangin' cows and other important things."

The irony in his tone did not deceive her. On sudden impulse she touched his forearm. "Link, you— you think they'll do something to Buzz for this shootin'?" Like putting him in prison?

Was Better Jumper

A singer once charged Handel with having spoiled his rendering of a certain number, and remarked that if Handel didn't accompany him better he would jump on the harpsichord where the player was, and smash it. Said Handel: "Let me know when you will do me, and I will advertise it. I can sure more beadle will come to see you shump as will come to hear you sing."

AND MORE TO COME

—South Wales Echo & Express, Cardiff.

Originated With Ancients

Germany Not Responsible For Sauerkraut States Berlin Man

A permeating odor of sauerkraut in the making throughout Germany moved a Berlin scribe to draw up its German origin and to bemoan the sorbriquets of "Krauts" and "Sauerkraut Fresers" which the world attached to Germans because of this many winter fodder.

But the indignant Berlin scribe does not dwell on native joys of sauerkraut consumption. He sticks to his argument that sauerkraut originated with ancient civilization and is today a favorite article of foreigners.

"They call us the 'Krauts' and 'Sauerkraut Fresers' in a score of languages, but which of our accusers can deny that tons of the stuff are annually imported by them," he asserts. "Furthermore, when we hear that the spott American stands at the bar and drinks a 'sauerkraut cocktail,' made out of cabbage juice, then we prize not only the advantage and goodness of sauerkraut but also the achievement of German cooking in far-off lands."

Sauerkraut, he reiterates, is not German's child but that of ancient cabbage growers.

The Greek physician, Dr. Dioscorides, living at the time of Christ, already was recommending sauerkraut to his patients," the scribe maintains. "Court physicians in feudal days recommended it regularly, proving that sauerkraut came down to us through the centuries. Goethe lived on sauerkraut until his friend, the Duchess Amalie, so shamed him with it day after day that he became a sauerkraut hater. From bitterness or for fun he wrote odds to it."

Without attempting to explain why Germans became the champion sauerkraut producers, the refuter of its nativity then sinks barrel-deep into praise of this food article and starts bragging that as far back as the 17th century, sauerkraut from Germany's shores ruled the ocean.

In the old days, when it took ships weeks and weeks to get across oceans, Germany supplied the world with sauerkraut because the stuff could be carried and kept fresh. Not everybody was grateful for this, for when sauerkraut became a frequent dish on foreign tables, they got even with us by calling us 'Krauts' and 'Sauerkraut Fresers.' The explorer Cook, in his report to the Royal Society, declared that he and his crew were saved from scurvy during their voyage because they had 60 barrels of sauerkraut aboard."

In the end, the writer admits that Germans relish their sauerkraut as much as their beer—not forgetting the affiliated pig knuckles and wurst—and that they as usual expect to stow away for the winter some 1,500 million pounds. And in concluding praise he sings the Holsteiner proverb: "He who trusts in God and swipes cabbages in summer has sauerkraut in winter."

Judge: "Speeding, eh?" How many times have you been before me?"

Speeder: "Never, your honor. I've tried to pass you on the road once or twice, but my bus will do only 55."

Ambulances are now being equipped with air-conditioning units.

RUNNING INTO SOMETHING

May Become Ghost Town

Coalhurst Citizens Face Prospect Of Having To Abandon Homes

Coalhurst, scene of southern Alberta's greatest mining disaster when 16 men met death early in December had a cheerless Christmas.

Untouched, Christmas trees lay in back sheds where they had been placed ready for decorating for the yuletide. Tinsel decorations lay unwrapped. All was forgotten when death struck the modest homes of the miners.

Twenty-three children were left fatherless. Some had known poverty in other years, but with more regular work at the mines and pay enabling them to move often, they had looked for a merry Christmas.

Preparations for Christmas were in full swing when the blast brought mourning. Presents were exchanged—relatives and friends visited the homes of the bereaved—but it was a far different holiday than was planned.

Its lone industry abandoned—the mine of the Lethbridge Collieries Limited, probably never to re-open in this generation—the town of 600 inhabitants faced the prospect of even having to abandon their homes before another Christmas comes. Coalhurst is destined to become a "ghost town."

Unprofitable to operate, it had been planned to abandon the lone world's theatre and opera stars. Disaster closed it earlier and its surviving workers must find new homes and new jobs.

Across the Old Man River from Coalhurst, close to the city of Lethbridge, a new \$1,000,000 mine soon will open. For some it will mean work but its modern machinery will offer less employment than the older mines of Alberta. Electric equipment will take the place of man power.

Looks After Wards Of State

France Educates Abandoned Children If They Show Promise

Official statistics reveal that 2,000 babies are abandoned in the department of the Seine, Paris and district, and left to the care of the state, every year.

But despite their poor start in life, some of these waifs have "made a hit" in life. Two of them are senators, four are deputies and one is an under-secretary of state.

In the army, two are generals and seven others hold high rank. One is an admiral and nine are captains in the navy. Other "unwashed" have made fortunes in commerce and industry.

In France, no formalities are necessary for the surrender of a baby. Mothers bring their children into the state home at any hour.

There are many who grow up knowing neither their name nor the place of their birth.

The little wards of the state, as soon as they are big enough, are sent into humble families and there reared, the state continuing to watch over their education and welfare.

In cases where they show promise, their education is continued. They are sent to a secondary school and then to a university.

But the waifs who fell in the war cannot have their real names on the roll of honor. The state, sworn to secrecy, has to keep the list in its secret archives.

Loss Of Face

Descendants Of Great Chinese Family Are Now Poor

Loss of face of a great family is shown by the recent arrest of Yuan Ke-Kau, the fourth son of Yuan Shih-Kai. He was in district court in Shanghai for patronizing an opium den frequented only by coolies and criminal laborers and, when arrested, was penniless.

Twenty-five years ago the father, Yuan Shih-Kai, was viceroy of North China, and later became president of the Chinese Republic. Twenty years ago Yuan Ke-Kau was himself emperor, and then the present Ningpo prisoner was known as the "Fourth Imperial Prince."

Yuan Shih-Kai was buried in a tomb costing more than \$5,000,000 and left an immense fortune, but to-day most of his children are poor. He was survived by 17 sons, three of whom have recently died.

Holidays In Leap Year

Two Come On Sunday And Christmas Is On Friday

It's up to the women this year. Divide 1936 by four and you get leap year.

February has an extra day, when tradition says women may propose to backward swains.

Day laborers get extra cash that month, too, but that has nothing to do with tradition.

Another feature about 1936 is a couple of holiday weekends.

May 24, Victoria Day, comes on Sunday so the following Monday will be a holiday.

Christmas will be on a Friday this year. If Boxing Day is observed the Saturday will be another, and then comes Sunday which leaves citizens three up.

Telephone lines of New York City are of sufficient length to form 35 lines from the earth to the moon.

Famous Wigmaker Dead

Willie Clarkson Was Interesting Figure In London's Life

The death of Willie Clarkson removes one of the most interesting figures in London's life.

Enslaved as a wig maker and famous as an impersonator and as an originator of costumes, he became at the end of his life a social personality who was never absent from first nights and was in demand at the most important social functions of the year.

He deliberately dressed to make himself a character, and used to allow his hair and beard to grow in fantastic shapes. Wherever he went he selected for himself some appropriate accoutrement which set off his handsome features and imposing manner.

"Wigs by Clarkson" has appeared on the programs of most of the productions of note during the past half century and his earnings—50,000 of them, from William the Conqueror's time onward, were part of his stock—have been used for military tournaments and fancy dress balls.

Young Clarkson had a flair for wig-making and fashioned them for the stars of the stage, kings and crooks as well. The wigs were made at the back of his shop in Wardour street.

Above the shop he had his home. He was unmarried. His flat is crowded with souvenirs given by the world's theatre and opera stars.

Sarah Bernhardt was a special friend of his, and he took particular pride in the wig in which she played Magdalen and had to throw her hair over the feet of the actor playing the part of the Saviour. The wig was of natural hair, 60 inches long!

Another large-sized job was the transformation of a lioness into a lion. A circus manager had announced the appearance of "The Fiercest Lion in the World" before he had seen the animal. Alas! It turned out to be a sleek lioness. But by the next afternoon Mr. Clarkson had fitted out the lioness with a magnificent mane mounted on elastic, and thousands were fooled.

Congress Of Hunters

Meeting To Be Held In Washington At Early Date

A continental congress of hunters, fishermen and others interested in North America's game resources—meeting with more than 1,000 possible delegates—was called by President Roosevelt to meet at Washington at an early date. Canada and Mexico probably will be asked to send representatives.

In calling the wild life conservation conference, the president followed the recommendation of J. N. "Ding" Darling, who recently resigned as chief of the biological survey bureau.

The noted cartoonist and conservationist, in submitting his resignation, urged such a conference to create a federation of all wild life agencies with sufficient power to obtain protective legislation.

Darling said the conference would cover everything from big game animals, such as deer, bear and bison, down to the smallest fish and fowl. Among the collateral subjects to be considered, the president said, are stream pollution control and better utilization of impounded waters, reservation lands, national parks and wooded lands.

Waters, he said, would be only indirectly involved.

Teaching English In Berlin

Employees Being Prepared To Handle Crowds At Olympic Games

A school for English has been opened in the best known cabarets in the West End of Berlin, Germany. Waiters, page boys and bar maids come to this cabaret in the afternoon. Across the front of the bar a blackboard has been put up and a teacher stands behind it.

The pupils sit around little tables at which, a few hours later, guests sip wines. They repeat in chorus the English phrases: "Good evening, sir." "What would you like to drink?" "Here is your change, sir." "Auf Wiedersehen—Goodbye."

The staff of forty cabarets, bars and restaurants in Berlin are joining in the special English courses as part of the preparations for the Olympic games next year.

The Newest Chain Store

Goods Kept Behind Glass And Released By Key

Marketing, Toronto, says Kee-doole is the name of a new type of chain store where the customer does all his buying with a key presented upon entering. Merchandise in packages is displayed behind glass-enclosed shelves the doors of which are opened by the key. Process of unlocking releases the desired article upon a conveyor belt. When purchase is completed, customer goes to the cashier's cage. The bill is paid and the cashier releases the conveyor belt which delivers the goods to the customer.

Business Conditions

A review of business conditions in the Dominion during the first ten months of 1935 indicates that Canada's economic recovery drive is favourably progressing.

Field studies of harvesting potatoes on 254 farms showed that diggers injured 10 per cent. of the potatoes.

PRINTING PRESSES FOR SALE

One Pony Optimum Cylinder Press one 10 x 15 and one 12 x 18 Chandler & Fry, of Windsor, Penn. Also 28-inch Gullitts Paper Cutter and one Linotype machine. All in excellent condition. Apply Box 326, Regina, Sask.

Little Helps For This Week

Man's goings are of the Lord; how then can a man understand his own way. Proverbs 20:24.

Be quiet, why this anxious head About they tangled ways? God knows them all. He giveth speed. And He allows delays.

We complain of the slow dull life we are forced to lead, of our humble sphere of action, our low position in the scale of society, of our having no room to make ourselves known, of our wasted energies and our years of "pence." So do we say we have no Father who is directing our life, so we say that God has forgotten us, boldly judge what life is best for us, and by our complaining do we lose the use and profit of the quiet years. O men of little faith. Because you are not yet sent out to your labor do you think God has ceased to remember you? Because you are forced to be outwardly active do you think you also, in your years of quiet, may not be about your Father's business? It is a period given us in which to mature ourselves for the work God will give us to do.

In Former Days

Comment On Manners And Fashions Of Yesterday

It may comfort the younger generation to know that scandalized comment on manners and fashions is not confined to the present. Grandmother had to put up with it, too.

An engaged girl in 1881 provoked an editorial in a Toronto newspaper, when she kissed her beau in public, and "looseness in dress" was the subject of an editorial protest in 1885, it was shown by clippings in an old scrapbook covering the period 1890-1896, which were the subject of an informal talk by J. Alex. Edmondson, Montreal lawyer, to a women's club.

So untrustworthy had men become in 1884—it appeared from an English clipping—that there was a movement on foot to allow women to be accountants.

Advertisements of the period indicated that the husband of 1865 was likely to come home to find his wife had bought him an "American steel" collar or collars and cuffs made of paper.

Infant Prodigy

Four-Year-Old Chicago Boy Is Expert Violinist

A four-year-old boy who has been raised as a nudie, romped into the Chicago Musical College for his daily violin lesson undisturbed by his lack of clothes or the fact that his teachers have acclaimed him a genius.

The child, David A. Davis, wore only a loin cloth under the cape his mother wrapped around him before he left home. He threw off the cape, raised a small violin to his chin and played "March in D" by Bach perfectly.

Max Fischek, David's instructor, said the child took his first lesson when he was two years and eight months old. He was four last October.

The turtle is the only animal on earth that can draw itself up until it is completely surrounded by its ribs.

Cats cannot see in absolute darkness. Their vision is unusually acute in the dusk, however.

Helping Mothers to Cut Down On Family's Colds

Unique Formula For Nose And Throat Helps To Prevent Colds—And To Throw Off Head Colds at the Start.

SOON CLEAR "STUFFY HEAD"

Mothers are often worried about those "family" colds that they find special comfort in this unique aid for preventing colds.

Vicks Vapo-oil, especially designed for nose and upper throat, where most colds start, Vicks Vapo-oil stimulates the functions provided by Nature for the nose—to prevent colds, and to throw off head colds in the early stages.

Used in time—at the first sniffle, sneeze or nasal irritation—just a few drops of each nostril—Vicks Vapo-oil helps to avoid many colds.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Vicks Vapo-oil spreads through the nasal passages—reduces swollen membranes—clears clogging mucus—brings comforting relief.

A Practical Guide for Mothers Each year, more and more families are being helped to fewer colds, shorter colds and milder colds by following Vicks Plan for Better Control of Colds. Vicks Plan has been clinically tested by practicing physicians, and further proved in everyday home use throughout the country.

Full details of the Vicks Plan in each package of Vicks Vapo-oil.

Premier Wires Douglas

(Continued from Page One)

Huckson to prevent any rush from outsiders. The meeting was described by one merchant who was present as a farce so far as secrecy was concerned. The premier explained that his only reason for calling the press was excluded was he thought a freer and fuller discussion could be had if only those concerned were present.

Federal Social Credit members of parliament held their caucus under the chairmanship of J. H. Blackmore, M.P., at Lethbridge, the group's leader, at the Parliament Buildings Wednesday and Thursday. A definite platform covering every question before the country was agreed upon. Mr. Blackmore told the writer the group would make no motion for discussion of Social Credit, but it would be prepared to discuss it to give support to the realization of Social Credit ideals.

That doesn't mean that we will be silent on Social Credit at Ottawa," Mr. Blackmore said. "It is certain we will take every opportunity offered of pointing out Social Credit principles would solve the various problems that present themselves. Premier Abernethy addressed the gathering Wednesday afternoon.

An advisory council representing all phases of industry, both retail and wholesale, with the premier will be appointed soon by the government to assist in drafting codes for the various industries. Premier Abernethy announced Thursday. The council provided for in the trades and industry act which will govern codes, will be composed of voluntary members, it was stated.

Hon. Charles Cockcroft, provincial treasurer, left Tuesday night for Ottawa, where he will meet Hon. C. A. Dunning, finance minister at a conference Monday and throughout the next few days with other provincial treasurers from the provinces to discuss the problem of finance and indebtedness and refunding schemes.

Mr. R. J. Magor, Montreal attorney, and Mr. J. C. Thompson, provincial auditor, will also attend as experts on behalf of the Alberta government.

It was announced by Premier Abernethy Wednesday that the 1936 motor licenses would be good for 15 months in order to bring the license year to conform with the province's fiscal year ending March 31. This change has been urged by motor associations for some time. The premier also announced that drivers' licenses would cost \$1 annually instead of the perpetual fee of 50 cents charged previously. Legislation for these changes will be introduced at the coming session of the legislature.

By a proposed amendment to the present legislation, it was also stated, a fuel tax will be imposed on all grades of fuel oil, but this will not apply to lubricating oils.

The tax and refunds to farmers will remain as at present the premier said.

How to Feed Pregnant Sows

Two of the most vital points in hog raising are the feeding and management of the sow during pregnancy, as these factors exert a considerable influence on the size and vitality of the young pigs.

The Dominion Experimental Station, Lacombe, has found that a mixture of 200 lbs. ground oats and 100 lbs. ground barley or wheat is well adapted to meet the main requirements of the pregnant sow. However, no grain mixture alone will supply enough protein and mineral matter to produce the proper development of bone and muscle in the unborn young without sapping the sow's system. To fill this need, skim milk or buttermilk should be fed as a supplement; or if neither of these is available tankage may be used, mixing five pounds in every hundred pounds of meal. Gills carrying their first litter should receive at least eight percent tankage.

It is well to supply the sow with suds, greenfeed and alfalfa meal or hay. Boosts, too, are good, lightening up the ration and whetting the sow's appetite.

To prevent hairiness in the young, 1 ounce of potassium iodide should be dissolved in one gallon of water, and one tablespoonful of this solution per sow added to the feed or drinking water once daily.

A mineral mixture consisting of 76 lbs. slaked coal, 20 lbs. common salt, 3 lbs. ground limestone and 1 lb. sulphur should be placed in a box or self-feeder where the sows have ready access to it.

In order to force them to take exercise, sows should be fed at some distance from the sleeping quarters. They should also be closely watched and the ration regulated to keep them from becoming over-fat.

"Hard times" are the hobbes of progress, and easy times are the harbinger of degeneration and downfall," George Barton Cullen.

The Grain Forum Radio Programs

"The Grain Forum" radio programme, which commenced over a network of Western stations on Friday, December 26th, is a half-hour feature sponsored by the Northwest Grain Dealer's Association and the Winnipeg Grain Exchange. It commences at 8:00 p.m. Central Standard Time and 8:00 p.m. Mountain Standard Time.

As its name implies, "The Grain Forum" is intended for the public discussion of matters of special interest in grain producers. Thus in the series to date, brief talks have been given and questions invited on the following subjects: "The World's Foodstuffs and the Place Occupied by Wheat," "The Winnipeg Grain Exchange, What It Does," and "What the Winnipeg Grain Exchange Does Not Do." This will be followed on Friday, January 17, by a talk on: "The Factors That Govern and Influence the Price of Wheat." Later in the series, another interesting subject will be discussed, namely: "Canada and Her Competitors."

Other features shown in the series will be a special competition in new under way for bona fide growers of grain or members of their families, who are asked to submit ten-minute manuscript speeches on either of the following subjects: "Some Major Problems in Grain Growing" or "Some Major Problems in Grain Marketing." Valuable cash prizes are to be awarded, fifteen in number, for the winning entries, and it is to be noted that the interest of opinion is welcomed and will not affect the opportunity of winning a prize. One of the winning contestants will be invited to Winnipeg as the guest of the sponsors of the "Grain Forum."

"The Grain Forum" welcomes constructive criticism and anyone who listens on Friday evening from 8:00 to 9:30 p.m. Central Standard Time (8:00 to 8:30 p.m. Mountain Standard Time) can thereafter consider himself or herself enrolled as a "critic" for the "Grain Forum" and is anxious to receive comment from its already remarkably extensive and steadily growing radio audience.

A Simple Style Of Green House

From a trench soil converted into a sub-ground arrangement for growing early plants on the premises of Mr. J. B. Early, noted irrigation engineer of Peace River, Alberta, was adapted the idea for a partly-sunken greenhouse which has been operating since 1933 on the Beaver Lodge Experimental Station, the Peace River District. The house is used primarily for producing early spring flower and vegetable transplants. Additional use has been made of the same structure for summer, indoor pot cultures.

The house was constructed in two sections, the original with a twenty-four-inch low wall and the addition with frame. The latter is truer and much more easily built. Two-by-six slats on a bevelled base give an inward slope to prevent drip from collecting and inducing decay.

A centered alleyway was excavated to a depth of 30 inches, the dirt being banked against the walls on the outside. This serves to retain warmth as well as support the walls, heavily burdened by the glass. Benches consisting of a skeleton framework of 2 by 4's designed to support a system of 15 by 20 inch boxes over 7 in. smoke flues emanating from the extreme end of the house, where are located two home-made gas-barrel stoves. In houses of sizes equaling 14 by 56 feet and in the Canadian Prairie West two such stove units are available, one on each side. Both are fired from the aisle. Although both heaters have seldom been operating at once, in early spring, a reserve for extreme cold was sometimes imperative. Two-by-four milled rafters are set at about one-inch pitch and are not absolutely essential, but highly desirable. Gables face north and south. Double Diamond lights 12 by 12 inches are considered best. Larger and single strength panes call for expensive and frequent replacements. Ventilation is provided for by a system of traps on opposite sides of the ridge.

A solid foundation is essential to avoid breakage of glass.

"Farmer Takes a Wife" at Avalon Theatre This Week

"The Farmer Takes a Wife" showing at the Avalon the last three days of the week, finds Janet Gaynor flashing through with such a sparkling performance that you'll have to believe in even higher Gaynor popularity. If it weren't for this extra special performance, the movie would go to Henry Fonda, who is going to be a new pulse-throb with the feminine world. The story deals with the early days of the Erie Canal. Janet is a canal-bait girl; Fonda is a canal-bait worker who is saving to buy a farm and loves Janet; Chas. Bickford is the leader of a rough-and-tumble gang of canal men who never lose a fight. Gaynor loves to see men fight, not because she is gory side of it, but because she believes it indicates manliness. Her allegiance to the canal takes her from one boat to another until Fonda goes back to his farm. Later he returns to thrash Bickford in one of the greatest fights ever put on the screen. And then guess what Janet does? No modern clothes problem here, but Gaynor looking her sweetest in a story that has no dull moments in it.

OVERFEEDING SILVER FOXES

Overfeeding is the great laguard of silver fox ranching, states the progress report of the Summerside, P. E. I., Experimental Fox Ranch, Dominion Experimental Farms, for the years 1931-32-33 and 1934.

Increasing Demand For Canadian Horses

In Canada at the present time the revival of interest in the breeding of horses is one of the most striking of the many activities of the Dominion in live stock production. There should be no question as to the necessity for this increased activity. There is a shortage of draft horses not only in Canada but in the United States and Great Britain, and it takes at least five years to produce and raise a horse to the age of four years. Also the annual wastage of horses in the Dominion due to disease, old age, and other natural causes, is very considerable.

While the number of horses on farms in June, 1935, showed an increase over that of June, 1934, it has taken the increased production of colts in 1933 and 1934 to reach the point where the annual increase exceeds the natural wastage of mature animals. At the same time, it will be remembered that the colts of 1934 and 1935 will not enter the ranks of the four-year-old work horses until 1938 and 1939, while the annual wastage goes on all the time.

In appreciation of the situation, the Dominion Department of Agriculture has continued its policies for horse improvement, and breeders in increasing numbers are availing themselves of this premium to assist. The Clubbing Policy, for example, which is effective in the Prairie Provinces, makes it possible for communities of farmers to secure the services of the best stallions available and retain them in the district from year to year, thus fostering community breeding and co-operative effort. The Dominion Department of Agriculture on its part makes a grant to organized horsebreeding clubs of 50 per cent of the quarter of the service fee for each mare proving to be in foal. In 1935 there were 206 such clubs in operation.

Under the Dominion-Provincial Premium Policy, effective in the provinces of Eastern Canada, in British Columbia, and in Saskatchewan, the Dominion Department of Agriculture and the Provincial Departments concerned join on a fifty-fifty basis in inspecting stallions and paying an annual premium to the owners of approved registered stallions.

CANNED TOMATOES
There was a further development in the shipment of canned tomatoes and tomato products from Canada to Great Britain during the first nine months of 1935. When complete figures for the whole year are available they will show an impressive volume of trade.

A noted lung specialist says that a man who sings at the top of his voice for an hour-a-day won't be troubled by chest complaints in his old age. He probably won't even be troubled with old age.

Recipes

Prepared by the Milk Utilization Service, Dairy and Cold Storage Branch, Dominion Department of Agriculture—each recipe is prepared for 12 servings.

Fruit Bavarian
1½ tablespoons granulated gelatine, ¼ cup cold water, 3 egg yolks, ¼ cup sugar, pinch salt, 1½ cups hot milk, 3 egg whites, 1½ cups whipping cream, 1 teaspoon vanilla, ½ teaspoon almond extract, 1 cup chopped red and green cherries or 1 cup candied fruits.

Soak gelatine in cold water. Beat egg yolks and combine with sugar and salt. Gradually add the hot milk and cook in top of double boiler, stirring constantly, until mixture thickens. Add gelatine. Cool, and when mixture is partially set, fold in stiffly beaten egg whites, cream, whipped until stiff, fruit and flavoring.

Nesselrode Pudding
1 teaspoon granulated gelatine, 1 tablespoon cold water, ¼ cup sugar, 1-3 cup water, 2 egg whites, 1½ teaspoons vanilla, pinch of salt, ½ pint (1½ cup) whipping cream, ¼ cup maraschino cherries, ¼ cup candied fruits, ¼ cup Sultana raisins, ½ cup broken nut meats—preferably French chestnuts.

Soak gelatine in cold water. Boil sugar and water until it spins a thread. Dissolve gelatine in hot syrup. Pour syrup slowly into beater egg whites. When cold, fold in stiffly whipped cream, salt, vanilla, fruits and nuts. Place in freezing trays of refrigerator and freeze 3 to 4 hours, or put in a mold, cover, and pack in ice and salt (6 parts ice to 1 part salt). Let stand 4 to 6 hours.

Cranberry Mousse
3 cups cranberries, ¼ cup water, 1½ cups water, 1 pint whipping cream, grated rind and juice of one small orange.

Cook cranberries with water until soft. Rub through sieve. Add sugar to pulp and cook 5 minutes. Add grated rind and juice. Cool. Fold in cream, whipped until stiff. Freeze as "Nesselrode Pudding."

Predict More Money For Farmers in 1936

Canadian farmers will probably have more money to spend during 1936 than was the case in 1935. Increased prices for most of the farm products, with the volume of the 1935 crop about equal to that of 1934, has placed the farmer in this improved position. In addition, the gradual expansion of industrial activity in employment are contributing factors to an anticipated betterment in demand from within Canada. These facts are pointed out in the "Agricultural Situation and Outlook," to be issued shortly by the Dominion Department of Agriculture and Trade and Commerce.

The "Outlook" in surveying the Canadian market for farm products points to conditions existing in various other Canadian industries, such as mining, lumbering, construction, and the iron and steel industry. Changes in the activity of these industries has a very real effect on the demand for farm products. The inter-relationship of agriculture and industry in Canada makes it necessary for farmers, as well as business men, to understand the situation in other fields of activity.

The Canadian export market for farm products is dominated by Great Britain and the United States. From Great Britain comes encouraging reports of business recovery, which will likely be reflected in the volume and prices of imports, especially of farm products. Canada stands in a good position to share in any trade revival. The United States also has been showing considerable improvement in the general situation over that of 1934. Increased imports of animal products and vegetable food products during 1935 was of substantial importance to Canadian farmers and it would seem likely that this trade may be maintained, if not improved, during 1936. One of the disturbing factors to international trade during the depression has been the uncertainty regarding the currency exchange. During 1935 there was a marked degree of stability between the currencies of the United States, Great Britain and Canada, which, while not solving the problem, has led to a restoration of confidence. There are various factors in several countries that tend to prevent for the time being at least a greater international trade in agriculture, as well as other products.

Discussion of these and many other factors of interest is to be found in the "Agricultural Situation and Outlook." Copies of this publication will be available for free distribution to farmers and others interested, on or about the 15th of January. Application for copies should be made to the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

"I think that history has pretty well demonstrated that the only way to get what you want is to go after it."—Marshall Tito Balbo.

We Want to Select

Reliable young men, now employed, with FORESIGHT, fair education and mechanical inclinations, who are willing to train spare time or evenings at home to qualify as INSTALLATION and SERVICE experts in Electric Refrigeration and Air Conditioning. New, profitable field. For interview write, giving age and present occupation.

Quips and Quirks

More and more as time goes on are we disposed to applaud the originator of the plan that put the Atlantic between America and Europe. —Ohio State Journal.

The skipper of a tramp steamer in writing up his log recording an eventful day, rounded off his task with the entry, "Mate intoxicated." On the following day it was the Mate's duty to write up the log, and he completed his account with "Skipper sober."

"Hello! Is that the doctor? Please come at once, my little boy has swallowed a pencil."

"I'll come immediately—what are you doing in the meantime?"

"Using my fountain pen."

Conductor: "Did you get home all right last night, sir?"

Passenger: "Of course; why do you ask?"

Conductor: "Well, when you got up and gave the lady your seat last night, you were the only two in the car."

"So you are building a new house, eh? How are you getting along with it?"

"Fine. I've got the roof and the mortgage on it, and I expect to have the furnace and the sheriff in before fall."

A man married a girl with a most uncontrollable temper. "What I cannot understand," he said to her, "is why I didn't realize you had such a temper before we were married."

"Well," she explained, "Whenever you said something to annoy me in those days, I used to go upstairs and bite pieces out of the oak dressing-table."

A famous minute was written by John Bright when he was president of the Board of Trade: "I have read Mr. Griffen's very able and interesting memorandum. I do not clearly apprehend whether he approves or disapproves the proposal which he discusses, but in any case I agree with him."

"How did you happen to marry?"

"The same old story. Started out to be good friends and later changed our minds."

Morality And Democracy

A Toronto newspaper editor, addressing a club in that city recently made an urgent plea for a return to what he termed the "Old System of Morality," basing his plea on the declaration that if democracy and its key-stones, freedom of the press, freedom of thought and freedom of action are to survive, reverence to former standards of morality is essential.

The editorial writer asserted that "democracy never was in greater danger than it is to-day, even though it may not be threatened by emperors or tyrants, except those of our own creation. The threat is the ultimate moral and physical collapse of democracy's constituent parts."

While perhaps some of the illustrations used by this editor were somewhat overdrawn, nevertheless the premises on which he based his argument are sound and the warning and its accompanying plea for rehabilitation of some of the virtues which dominated family life and were regarded as an essential in the conduct of trade and commerce in the days of our parents and grandparents are worthy of consideration and should be heeded.

The pendulum of morality and conduct has swung through a wide arc since those days when it was regarded a sin to read a newspaper on the Sabbath day, when children were universally taught and expected to reverence their elders and when those elders themselves were largely motivated by simple but inspired rules in the conduct of their homes, their farms or their businesses and in their relations with their neighbors.

Perhaps the pendulum has swung too far in the direction of lack of restraint and elimination of self-governance, for it is a sine qua non that self-governance is a necessity before one can govern others with success or inspire respect. The loosening of moral standards of the individual is bound to have an adverse effect on the life of the community and the nation and eventually to determine the communal and national welfare.

Few perhaps are prepared to argue that we should return to the prohibitions and restrictions of the mid-Victorian era in their entirety but there is reasonable ground for argument that reversion to some of the virtues which dominated the actions of the period would not only not be amiss but would tend to strengthen a weakening democracy.

Who would deny, for instance, that a more extensive practice of thrift, hard work, reverence for authority, respect for law and order and simple pleasures, would tend in the direction of building up a vigorous, self-reliant nation, or that a nation of individuals, thus morally equipped, is best able to hold its own in the conflicts for supremacy and in the battle for maintenance?

The value of these virtues in the individual in determining the national advancement and welfare is well illustrated in the achievements of the Romans in the century immediately preceding the birth of Christ. During that period the Roman Empire reached the zenith of its brilliant career. It was the era of its most illustrious writers, agriculturists, historians, law makers, commanders and statesmen, yet it was a period in which the simple virtues dominated the upbringing of the youth and the lives of the people. Testimony to that effect is afforded in a bulletin recently published by one of the grain companies in which the following quotations are found:

"The education of the Roman boys and girls of the period was designed to fit them for farm life. Girls were taught to manage a home, to spin and weave; boys to plow, sow, reap, and to manage the business affairs of the farm, and, as well, to know how to conduct the various offices of state, including the very highest for farmers above all others, were chosen to fill these exalted positions.

"The character of the young people was moulded so as to develop a respect for parental authority and for law and order. They were taught to be modest in speech, discreet in behaviour, and as well to be thrifty and self-reliant."

The practice of these simple and fundamental virtues does not necessarily involve abandonment of the fruits of scientific achievement, which have so bountifully enriched present day life, but it does mean that we will take advantage of them as we can afford them without mortgaging the future to the hilt.

There are evidences of a desire on the part of our governments to return to the sound policy of balancing their budgets, in other words to revert to the "pay as you go" plan. Their success in achieving this laudable ambition will largely be determined by the attitude of the people which have placed these governments in authority, and the attitude of the people will be governed by their own views and practices in their private and business lives.

The fact that this tendency on the part of our governments exists is a healthy sign, for governments are supposed to have their ear to the ground and to know what the people want.

Maybe the pendulum has already started to swing back.

Quakes Are Annoying

Northern Ontario Settlers Are Now Becoming Jittery

This business of earthquake shocks up along the Temiskaming and Northern Ontario railway has gone far past the thrill and novelty stage. If they don't soon stop, say harassed settlers, the government will have to do something about it.

The folks up around Diver station, 30 miles north of North Bay, are restless, nervous and plain fed up. The latest complaint came from F. E. Salmis, who may be regarded as an official spokesman for settlers in the Diver area.

Settler Salmis snowshoed two miles from his cabin to the nearest telephone line and let it be known the least the federal authorities can do is start an investigation. After all, there must be some cause for these rattlings and shakings.

Mr. Salmis said tremors have been felt ever since last May, and the big "quake" of Nov. 1, with its epicentre near Diver, left a trail of recurrent rumblings and quivers.

"They last from a few seconds to more than a minute, and have come at the rate of 15 or 20 in a single day," said Mr. Salmis. "I think the ground in which my cabin is built must be hollow, for the cabin seems to lift right up in the air when the 'quakes' come. And from the sound of the rumbling, I believe the ground on each side is hollow too."

Identification Cards

Use Throughout Canada Is Recommended By Montreal Citizen

Use of identification cards for citizens throughout Canada, was recommended by Brig.-Gen. E. de Panet, president of Montreal unemployed relief commission.

Such a scheme, he told members of the City Improvement League, would aid greatly in such problems as registering unemployed, preventing impersonation at polling stations and would also serve in the nature of a prospect within the country.

No man can make a fool of himself all the time. He has to sleep occasionally.

There are only 12 letters in the Hawaiian alphabet.

VICKS COUGH DROP

Reconstruction Policy

Parliament To Be Asked To Endorse Proposal

Parliament will be asked at the coming session to endorse a proposal for a wide-sweeping national reconstruction policy, including building homes, slum clearance, land and settlement and reforestation. Loans under the scheme would be made available at low interest rates, while the creation of greater opportunity for the youth of Canada would be a major objective.

Sponsoring of the proposal will be Thomas L. Church (Cons., Toronto-Broadview), who will ask approval of a resolution in the following terms:

1. That in the opinion of this house, Canada should immediately adopt a comprehensive national housing, building, reconstruction, renovation, slum clearance, land settlement and reforestation policy adapted to its circumstances, and also embracing as one of its main features a national policy for youth in relation to education and industry and employment, so as to get people off the dole and back to remunerative employment.

2. And further, this house is also of the opinion that in any such national reconstruction policy low rate structure for bank, mortgage and insurance loans is an immediate necessity. Such a reconstruction policy to also embrace protection for industrial workers in urban and suburban areas from forfeiture on the same principle as farmers and fishermen are now afforded by existing legislation.

New Dwellings Needed

Many Homes Needed In Canada To House Low Wage Earners

The board of control at Ottawa has under consideration a report from a sub-committee of the National Construction Council of Canada saying at least 2,096 new dwellings are needed to house low wage earners and relief tenants.

The report said at least 570 existing occupied dwelling units might be demolished to make room for new and more satisfactory houses.

It added rehabilitation of 1,369 houses should be launched and that 5,625 families are occupying 3,529 dwellings, causing serious overcrowding.

Planted Trees For Arrows

On Inch Lomond, one of the many islands in Loch Lomond, Scotland, guides point out to travellers young trees which the Scots say were planted by Robert Bruce. From them he provided shafts for his archers.

A Thought Camera

Unusual Scientific Achievement Comes From Moscow

Among the advancements made by science during 1935, the amazing discovery of the researchers of the Moscow Brain Institute, which enables human thought to be photographed, is outstanding. This "thought camera" is a very delicate instrument which collects the minute electric waves the brain is constantly sending out, and records them in a band of lines upon a sensitive plate.

These waves vary greatly: when the brain is idle the chart is marked like the profile of a mountain range of peaks and valleys, and the waves appear to be affected only by the beating of the heart; when the brain is busy, the chart records a hard straight line.

This unusual scientific achievement is accomplished by an extremely delicate and elaborate apparatus. First, there is a headpiece which holds two needles that may be inserted through to scalp to the bone of the skull just above the temples. Wires are attached to these, and pass to a transformer which steps the current up to 1,000 times. These wires are finally connected to a dial with a hand, and as this hand moves back and forth under the influence of the electric waves from the brain, it is photographed.

On the surface, this discovery may seem to be a toy of science. At any rate, it does not appear to have any practical use. It is hoped, however, to translate its recordings, ultimately, into terms of applied psychology. Cures for some mental ailments have long eluded doctors, and this baffling is a challenge to researchers.

Some Jules Verne or H. G. Wells among the brain waves may tell us that one day the brain waves (used in the scientific sense) may be translated from electrical impulses to light, and so produce pictures which may be thrown upon a screen. It sounds like a fable—until one recalls how the radio records electrical impulses to sound!—Winnipeg Free Press.

Hunter Kills Blue Moose

Alberta's Oldest Inhabitant Never Saw One Before

Paul Bunyan's blue ox has turned up again, but in the form of a blue moose, which is a metamorphosis quite easy for it to accomplish, since it has done more wonderful things than that in its long life. This time it has chosen the Alberta woods for its scene of action.

The blue moose isn't really a brilliant blue. R. Van Buskirk of Coalfield, who shot it at Carrot Creek, says it looked blue to him when he saw it alive, and even yet, he avers, it has a bluish cast when the sun shines on it in a certain way. In an ordinary inspection, however, its coat of hair is a slightly brownish gray, suggesting the effect that human hair tonic or dye has on hair that is turning white.

Mr. Van Buskirk took the carcass to Edmonton and triumphantly displayed it as proof of his strange tale. Sure enough, there it was: a moose such as the oldest inhabitant in the country between Edmonton and Carrot Creek never saw before. The animal was in no other respect unusual or freakish, though smaller than the average moose and weighing about 400 pounds. But Mr. Van Buskirk has no explanation of how or why it turned blue-gray-brown, or whatever color it really is.

May Become Reality

Houses Made Of Glass Now Believed To Be Practical

It took a day as if the long-tailed of glass houses may become a reality in the not distant future. Glass is invading new fields and is developing new forms for practical use. A certain Boston firm has, after months of research, perfected a process of drawing glass into fibre capable of wide application.

This company claims that it is now practical to think of living in homes and working in buildings built of glass-blocks, insulated against heat and cold by glass "wool". The blocks, as it is said, permit up to 86 per cent of outside light to enter without glare.

Many Spoiled Ballots

One Out Of Every 98 Votes Cast Rejected At Federal Elections

Last federal election broke all records for spoiled ballots. It was announced after complete figures had been reckoned by the staff of the chief electoral officer. Out of a total vote, now corrected to 4,452,262, there were 85,558 ballots rejected, approximately every 98 votes cast. In the 1930 election 24,119 ballots were rejected out of a total vote of 3,922,481. That was approximately one spoiled ballot in every 162 votes cast.

Youth (artificially): "I adore you. Your beauty intoxicates me. Will you marry me?"

Sweet Young Thing: "No. I don't intend to give you the chance to say that you were drunk when you proposed."

Greenland is the only place in the world where the mineral cryolite is found in quantity. 2131.

Economic Council

Premier Of Nova Scotia Appoints Prominent Men Of The Province

Representatives of Nova Scotia's mining, lumbering, fishing, agricultural and manufacturing industries were named along with education and labor authorities to a newly-created economic council by Premier Angus L. Macdonald.

Nine prominent Nova Scotians, headed by Dr. A. Stanley MacKenzie, former president of Dalhousie University, who will be chairman of the commission, had assured the premier they were "quite ready to render their assistance in every possible way."

The council was instituted on the recommendation of the Jones commission which investigated the economic ills of this province a year ago and reported "we believe that the first need is the establishment of an economic council."

The following were named as members of the council: Dr. A. S. MacKenzie, a noted Canadian scientist, former president of Dalhousie University and senior member of the national research council of Canada, chairman;

Dr. B. B. Balcan, professor of economics, Acadia University, Wolfville—representing education;

F. W. Gray, assistant general manager of the Dominion Steel and Coal Corporation, associated with the Nova Scotia steel and coal industry in various executive capacities since 1909—representing mining;

C. G. Hawkins, of Milford Station, Kings county, prominent Nova Scotia lumberman;

Neil Macaulay, president of the pulp council of the Sydney steel plant—representing labor;

Dr. Donald F. Macdonald, associate professor of geology at St. Francis Xavier University, Antigonish, who has had wide practical experience as a geological expert since 1908 when he graduated from George Washington University;

O. F. MacKenzie, president of Halifax Fisheries and established that exporting firm in 1914 after he had had practical experience as a fisherman—representing fishing;

Frank Stanfield, Truro, president of Stanfield's Limited—representing manufacturing;

F. Waldo Walsh, director of marketing for the Nova Scotia department of agriculture—representing agriculture.

The council will probably meet early in the new year. One of its first duties will be to appoint a permanent secretary. All appointments are effective immediately.

Italian Duke

Member Of Italian Nobility Dies At Vancouver

Member of the highest Italian nobility, Leone Caetani, Duke of Sermoneta, who had resided in Vernon, B.C., in recent years, died recently in the Vancouver General hospital after an illness of more than a year. He was 66 years old.

The duke was born at Rome in 1869, the eldest of five brothers; and as Prince of Teano he succeeded to the title in 1917 on the death of his father, the duke, the 15th duke, being the head of the old Roman house whose family history dates back more than 1,200 years and which has produced among other notable men, two popes, Boniface VIII. and Gelasius II.

He attended the University of Rome, taking his degree in ancient and Oriental languages and history. Afterwards, he travelled extensively and over a long period in India, Africa and the near east, acquiring a wide knowledge of those places.

World's Oldest Men

Have Just Died Within Short Time Of Each Other

The world's oldest men have just died almost at the same time. At Mala Krana, near Belgrade, Jugoslavina, a man named Trajko Smiljkovich has died at the age of 131.

He had been married for 80 years, and enjoyed good health almost to the end of his life. His wife who survived him, is still upright and sturdy. All the peasants for miles around are mourning for the old man, for he was an excellent story-teller and a mine of historical reminiscences. Besides this, they regret that his one ambition—to ride in a motor-car before he died—was unfulfilled. Meanwhile the oldest man in Durban, Natal, has died at the age of 108. He was Krammchund, an Indian market gardener. He came to Durban from India in 1874.

A Simple Preventive

Of eight victims of diphtheria in Toronto last year, only one had been vaccinated. Among more than 100,000 immunized since 1929, this is the only case of diphtheria. The disease is fatal, and there are said to be circumstances which explain this one. Is there any other deadly disease where a simple preventive measure is so sure a guarantee against a fatal attack?—Toronto Star.

Eighty per cent of all adults are immune to infantile paralysis, according to estimates.

Do right and fear no man. Don't write and fear no woman.

A seven-leaf clover has been discovered by scientists.

"KNOW CANADA" CONTEST Starts Jan. 4

531 Cash PRIZES

1st Prize	\$1,000.00
2nd Prize	500.00
3rd Prize	100.00
4th Prize	50.00
5th Prize	25.00
6th Prize	25.00
20 Prizes of	10.00
30 Prizes of	5.00
475 Prizes of	2.00

Just think what you could do with \$1,000.00! Make a big payment on a new home—buy a new automobile—buy new furniture for your home—take your family on an extended trip—assure a college education for your children. The STAR WEEKLY \$3,000 "KNOW CANADA" PUZZLE CONTEST offers \$1,000.00 as the first cash prize. 531 prizes in all—all cash prizes. The contest itself will provide a great deal of fun and prove of real educational value to your whole family. Be sure to enter. Match your skill against your neighbors and win one of these big cash prizes that will give you money to go places and do things.

For 12 weeks The Star Weekly will contain four puzzle pictures each week—48 pictures in all—each picture suggesting the name of a Canadian city, town, lake, river or other named geographical feature. The problem is to select the correct name to suit each picture. A list of names printed beside the pictures will contain the correct answers for all the geographical features pictured. The contest is open to everyone.

In Canada and Newfoundland—except employees of The Toronto Star Weekly and The Toronto Daily Star and their families. As many members of one family as wish can enter the contest, but each must send in a separate set of puzzle pictures, with names selected—and any person can send in as many entries as he, or she, wishes, providing a complete set of pictures, with names suggested, accompanies each entry.

STAR WEEKLY \$3,000 CASH CONTEST

New Engine For 'Plane

Famous Freighters Will Take To Air Again Soon

One of Canada's largest "planes," the famous Junkers JU-52 freighter brought to this country in 1932 by Canadian Airways, will take to the air again soon and prairie residents will get their first chance to see it.

The huge ship, built to carry tons of freight and with a cabin so large a man can walk up and down it without bending his head, only made a few flights in northern Manitoba when it became a "white elephant of the air." The motor gave out and the Canadian aeronautics branch's refusal to license the ship even if repair parts were obtained caused Canadian Airways to put it in storage. The government air experts said it was not big enough for such a huge plane.

But the British air ministry just recently released one of its proved 900-horsepower Rolls Royce air motors and Canadian Airways purchased it. One-third greater in power than the original motor, the Rolls Royce will be fitted to the Junkers and the plane again put in operation. Present plans are to fly it over the prairies in tests before taking it north again for the heavy freight work there.

Canada Must Support League

Canada's proper future is tied up with the British Commonwealth of Nations and the League of Nations and it is to this country's advantage to support these groups wholeheartedly, declared Sir Robert Falconer, president of the League of Nations Society in Canada, in an address before the Border Cities branch at Windsor, Ont.

A seven-leaf clover has been discovered by scientists.

Enjoyed Calgary Stampede

Earl Of Willingdon Would Like To See It Again

The Earl of Willingdon, former governor-general of Canada and now viceroy of India, would like to visit Calgary again before he dies and see the stampede. He expressed his wish in a letter to E. L. Richardson, general manager of the Calgary Stampede and Exhibition board.

"How well I do remember the delightful time we had with you and I, before I died, to come and see you all again," the letter said. "Do give my greetings to all my own friends."

While governor-general of Canada the Earl of Willingdon, accompanied by the Countess of Willingdon, opened the Calgary stampede and spent several enjoyable days with the pioneers, ranchers, cowboys and Indians who took part in the plains spectacle.

New Discovery Important

Chemical Prevents Ice Forming On Aeroplane Wings

A chemical method of preventing the formation of ice on aeroplane wings has been discovered by research engineers of the Royal Air Force, it was announced by Sir Philip Sassoon, parliamentary under-secretary to the air ministry.

It is generally believed the loss of the Belgian air liner December 10 near Tatesfield, Kent, which took 11 persons to their death, was caused by the accumulation of ice on the plane's wings.

Sir Philip said the new discovery is being carefully developed and is expected to make for greater safety in all kinds of flying weather.

Still a car will keep running despite new models that make it look funny.

Just Beginning Its Career

Premier Of South Africa Voices Faith In League Of Nations

Former Premier Jan Christian Smuts, speaking in Pretoria, South Africa, of war horrors said:

"Thank God a reaction is setting in against this fatal drive to destruction. He declared 'a new temper' finally was arising and that there was due principally to a new sense of grave dangers," resulting in the recent "spirit of activity of the League of Nations in the Italo-Ethiopian conflict."

The League is not moribund or on its last legs," he asserted, "but only binding its feet, only beginning its career. Henceforth more and more it will stand forth as the determined foe of imperialism, of that spirit of aggressive expansion and annexation that characterized the old pre-war order and which was fondly thought to have been killed in the World War but is again showing its horrid heat in world affairs."

Almost A Tragedy

They had been married only a month and he had left for a few minutes while she prepared a salad in the kitchen.

Suddenly a piercing scream rang out, and he rushed to the kitchen prepared to face the worst.

"Whatever is the matter, darling?" he panted.

"It's a—'a caterpillar!' she said, with an effort. "Oh, Herbert, what if I had been in the house alone!"

"What do you make a week?" asked the judge of an Italian organ grinder.

"Twenty dollars, sare."

"What, twenty dollars for grinding an organ?"

"No sare, not for da grind, but for da shut up and go away."

Contends Democracy Threatened By Moral And Physical Collapse

Re-establishment of the old system of morality is necessary if democracy, abused by those who have benefited most from its freedom, is to survive. C. O. Knowles, editor of the Toronto Evening Telegram, told the annual meeting of the Good Fellowship Club.

He urged a more intelligent use of "this freedom" which, he said, started with the freedom of the press, which was the beginning and end of all civil liberty under the democratic form of government.

"If any intelligent audience were to be asked to-day what was the greatest privilege we enjoy, the answer would undoubtedly be the priceless heritage of personal freedom—freedom of thought, freedom of speech, freedom of action—something that we have come to regard as the inalienable right of the British people," Mr. Knowles said.

"When we speak of the freedom of the press, we rarely grasp the full significance of what is involved. The freedom of the press is not merely something in the nature of a special privilege accorded to newspaper publishers. Without a free press you have no other kind of freedom. This right to print newspapers, periodicals and books is merely one phase of man's freedom in every phase of life."

"A free press is the sign manual of democracy. The first act of a dictator is to strangle a free press and substitute therefore public relations for the purpose of proclaiming his own superlative greatness. You have glaring examples of this in three great countries in the world to-day."

Mr. Knowles declared democracy never was in greater danger than it is to-day, "even though it may not be threatened by emperors or tyrants, except those of our own creation." The threat, he said, is the ultimate moral and physical collapse of democracy's constituent parts.

"The greatest menace which threatens our civilization to-day is the so-called high standards of life—the ease and luxury regarded as modern necessities by the dominant white race," he declared.

Life has been speeded up without any regard to whether or not it was in man's best interests.

"It is only necessary to frequent the moving picture theatres to grasp the fact that the most childish form of entertainment is the most popular. The lowest forms of literature and imitations of science and art have the greatest appeal to the masses. Books are circulated through Sunday school libraries to-day which in your mother's day could not be openly sold, and any clean-minded person would blush if they were found in his possession."

"Reason has swept away religious beliefs, and moral standards even among the so-called better classes are deplorably low. We have emptied the Sunday schools and the churches, while the reformatories and the jails are filled to overflowing."

Enjoyed Their Liberty

Chimpanzees At Baltimore Medical School Smash Test Tubes

Three huge female chimpanzees escaped from their quarters at the Johns Hopkins medical school in Baltimore, and during a period of liberty spread havoc.

Swinging along with ease and grace, they first entered a class room in the anatomy building by a window. Test tubes flew in all directions as the chimpanzees listened merrily to the tinkling of breaking glass.

One of the chattering trio was trying to find out what made an electric clock tick when a small posse of instructors descended upon the class room. The chimpanzees slipped quietly out through the window as the instructors entered.

The chase led to the courtyard of the medical library. One of the chimpanzees, nicknamed Mae West, swung a lusty punch at an unnamed instructor in anthropology as he attempted to lure her with food. The instructor ducked, just in time, and fled.

Finally, the havoc-making trio was coaxed back into the cage with food and the excitement ended. They had slipped out while repairs were being made to their quarters.

Fur Caps Were Scarce

Air Pilot Could Not Find One In Vancouver

When Pilot L. F. Barr, owner of an air express company at Atlin, B.C., stopped in Vancouver en route north, he tried unsuccessfully for four hours to find a fur cap to augment his equipment for the north country.

He failed to find anything remotely suitable, however, although one firm offered to manufacture one for \$30 and he left feeling that Vancouver may boast at least of its mild winters.

German experts have successfully used coal, either in liquid or powdered form, as a plant fertilizer. Orchids are benefited by it.

India's trade with the United States is much greater than last year.

Wheat As A Feed For Live Stock

Low Grade Wheat Should Be Mixed With Other Grain

The year 1935 will be remembered as a very disappointing crop year. As a result of rust, frost and hail, yields of all grains were very much reduced and much of the wheat is of very low grade. Prices for this low grade wheat are so extremely low that, where possible, farmers will be wise to find some other method of marketing than through the elevators.

Wheat of good quality is a valuable feed for fattening purposes but low grade shrunken wheat, because it is usually richer in protein than plump wheat, has a tendency to produce growth rather than to fatten live stock. For this reason, although it is a particularly good feed for young growing stock and for much cows, badly shrunken wheat fed as the sole grain is not a good feed for finishing market animals.

Wheat that is badly shrunken is lacking in the starch necessary for producing fat and, if barley or reasonably good quality is mixed with it the feeding value of the ration will be increased. Much of the 1935 grown oats and barley will contain a higher percentage of hull than usual and as wheat, fed alone, often forms a pasty mass in the animal's mouth, the addition of oats and barley would tend to overcome the "gummy" tendency of the wheat. For good results any grain should be mixed with at least one other grain and this is especially true of shrunken wheat.

Wheat may be fed with satisfactory results to cattle, sheep, goats and even horses. It should be ground coarsely or rolled for cattle, hogs and horses. Sheep apparently do just as well on whole wheat as on ground wheat.

In an experiment conducted at the Dominion Experimental Station, Lacombe, Alberta, to obtain data relative to the feeding and "hog market" value of frozen wheat, it was found that frozen wheat, when marketed through pigs selling at \$7 per hundred, live weight, realized 82 cents a bushel.

Wood In Our Shoes

Strange As It Seems Wood Enters Into Production Of Footwear

It is astonishing how important the little things of life are. Some of them have been the great romances of industry, bringing huge fortunes to inventors. The little wooden clip at the end of a shoe lace is one of them. What a boon it has been to mankind, what woe to the children when it works off and shoes have to be laced without it.

Most of our boots and shoes are made on wooden lasts and some of us keep them on wooden trees. Some wood actually goes into the finished boot or shoe in the form of pegs, shanks and heels.

These wooden shankings are all small things but their manufacturing creates a great deal of work and even in a small population like ours there are actually 600 people engaged in turning them out. Last year the factory value of the output was a million and a quarter dollars. A full illustration of the work they create for others, the materials they use in the industry cost nearly \$400,000.

The plants which manufacture these wooden shankings are located chiefly in Montreal.

This information is taken from a report issued by the Forestry Branch of the Dominion Bureau of Statistics.

Want Antelope Ranch

Suggestions To Start One In Saskatchewan

Suggestions that an antelope ranch, similar to the buffalo park at Wainwright, be established in southwestern Saskatchewan are being received in government circles.

Farmers of the area report that herds, ranging from 100 to 250 animals, are roaming the district.

Reports of such herds have come from Lacadena, south and west of Swift Current and Empress. A report was received from Gravelbourg that a herd had appeared north of that town, overnight.

Was Gentleman Anyway

Fred Stanley, 45-year-old Salesman, Of San Francisco, Was Before The Court On A Battery Charge

Mr. and Mrs. Roy McGilchrist—she with a discolored eye—are complaining witnesses. "I'm too chivalrous to hit a woman," protested Stanley. "But if she said I did, I'm too much of a gentleman to contradict her." He was fined \$100.

It is estimated that for every 10 men making steel, five more are kept at work supplying them with raw materials.

It has been estimated that English women buy 5,000 lipsticks every year.

America's robin redbreast is really a migratory thrush.

Wrote Best-Known Hymn

Henry Francis Lyte Author Of "Abide With Me"

A good many people were surprised at the time that the King's favorite hymn, "Abide With Me," was not included in the Jubilee Service of Thanksgiving. "Abide With Me," both in its ordinary setting and in the lovely arrangement by Liddell, is one of the best-known hymns in the English language.

When Queen Elizabeth entered St. Paul's Cathedral to give thanks for the defeat of the Spanish armada, one Henry Lyte, botanist and antiquary, presented to her a copy of his book, "The Light of Britayne," which he had dedicated to her. Centuries later, his descendant, Henry Francis Lyte, then a Devonshire clergyman, wrote the hymn which was to become the favorite of another monarch.

Lyte was born in Scotland, educated in Ireland, and worked in England. As a boy he left Edinboro, near Kelso, to go to school at Portora, Enniskillen. He trained as a doctor, but later took Holy Orders, graduating from Trinity College, Dublin. In 1815 he was appointed curate at Tashman, near Wexford, and he had to resign owing to ill-health. Two years later, at Marazion, in Cornwall, he married Ann Maxwell, who wrote a chapter of Boswell's "Life of Johnson."

They were ideally happy together. The only cloud being Lyte's delicacy. But in 1823 they went to Lower Brightham, in Devon, where for 24 years he was a much-loved pastor to the simple fisher-folk. It was in the old rectory of Brightham that he wrote the hymns "Pleasant Are Thy Courts Above," "Praise, My Soul, The King of Heaven," and other favorites. Descendants of the roses he planted in the old-fashioned garden above the sea still bloom there.

Had weather came, he used to climb Berry Head to warn the fishing fleet. And to-day the bells of Brightham church chime out the notes of his best-known hymn as the fishing smacks put out to sea.

On September 4, 1847, Lyte knew he was a dying man. But he wanted to preach just once more in the little church which his heart loved. His people knew it, too, and never were words listened to with more strained attention than was Lyte's last sermon.

That night, watching from his study window the sun setting in glory across Torbay, he wrote "Abide With Me."

"Swift to its close ebbs out life's little day;
Earth's joys grow dim, its glories pass away;
Change and decay in all around us lie,
O Thou who changest not, abide with me."

Two months later, on November 20, 1847, he lay dead at Nice. And the words of his best-known hymn were printed for the first time on his tombstone in the English cemetery there—Edinburgh Scotsman.

Cause Serious Damage

Many Parasites That Affect Horses Exist In Canada

It is as necessary as it ever was for the young farmer to learn all he can about the care of horses. Parasites of horses and the diseases caused by them are always of considerable importance. Young animals are particularly more susceptible and less resistant to the ravages of these pests and may be permanently affected, if nothing is done for them, before they reach the age of usefulness.

Dr. A. E. Cameron, chief veterinary inspector of the Health of Animals Branch, Dominion Department of Agriculture, states in the bulletin on "Parasites of Horses," issued by the department, that a large variety of parasites of horses, both external and internal, exist in Canada, or may be introduced into the Dominion, and consequently it behooves the horseman to be constantly on the watch to prevent the serious damage which follows heavy infestation by these pests.

Contaminated water or food is a great cause of diseases, and stables should be kept as clear of manure as possible. Practically all organs and tissues of the horse may be invaded by mature parasites or their larvae, and the method of combating the ravages of the pests are fully dealt with in the bulletin.

An Example Of Brevity

Lord Tweedsmuir Tells Of Essay Written By A Small Girl

Out of the mouths of babes and sucklings Lord Tweedsmuir, governor-general of Canada, gave the Canadian Club at Ottawa "an example of magnificent brevity and succinctness" in the course of a luncheon speech. It delighted the audience.

Here it is: "A small girl was asked in school to write something about the prophet Elijah. The answer was as follows: 'Elijah was a prophet who was much annoyed by a small boy. He said, if you annoy me I will let loose my bear on you and he did, and it did.'"

Electrical devices for modern poultry farms include electric egg candlers, sprayers, water systems, burglar alarms, and brooders.

The SNAPSHOT GUIDE

HAVE A SNAPSHOT PARTY

Some people just naturally frown on the idea of doing anything unusual or different, but be that as it may, here's a suggestion for a new kind of party. A "Snapshots at Night" party, and the chances are it will be voted by those who are fortunate enough to be invited as an outstanding success.

To further add to the merriment of the party you might have your guests come in costume. Tell them to come dressed as their favorite movie star, some famous person of history, a character from one of the nursery rhymes, or you might simplify the matter of costumes and make it a regular "Kid Party," all guests dressing as children.

Setting the stage for your Snapshots at Night Party is very simple and can be done before your guests arrive. Here is what you do. Place a chair in an out-of-the-way part of the room so that it will not be disturbed by the guests as they arrive. Close to the back and to the right of the chair place a floor lamp so that the light bulb is about two feet from the back of the chair. Now tilt the shade slightly upward so that it will throw the light directly over and down on the shoulders and head of the person sitting in the chair. About three feet in front of the chair place another floor lamp with its shade tilted to throw the light directly on the face of the subject and chair. You now have one floor lamp back of and to the right of the chair and another one three feet in front of the chair or subject.

With the lamps in this position you will have to take the picture from the side, so place your camera on a table or some firm support at a point where you can see all of your subject in the finder. If you have a folding camera with an f4.5 lens open it to this aperture and set the shutter speed at 1/25 of a second.

With super-sensitive panchromatic film in your camera and two Photo-flood bulbs in the lamp facing the subject and one in the lamp back of the chair you are ready for the arrival of your guests and fascinating indoor snapshots at night.

In placing your camera be sure that neither of the lights shines directly into the lens of the camera or shows in your finder.

After your guests have arrived lead them one by one to the "magic chair," switch on the Photo-flood lamps, and—snap—you have the picture. And you can count on most merriment as each faces the camera.

Suppose you do not have a camera with a lens as fast as f4.5. You can have your party and take pictures with any camera just the same. You can take a short time exposure without any change in your set-up.

In taking either a snapshot at night at 1/25 of a second or a time exposure picture, caution your guest not to move when the picture is actually being taken.

Your and your guests will have fun at a Snapshots at Night party and in turn you will have some highly interesting pictures to look back at for many years to come.

JOHN VAN GUILDER.

Streets To Be Renamed

Great Number In London Are Duplicated Many Times

Officials of the London County Council have taken on rather an unusual job. They are going to look over the names of the 18,000 streets in the metropolitan area and think up new names for a great many of them.

History is responsible for the names of streets in all cities. London has, for instance, 74 Victoria Streets, and 61 bearing in front of Queen's street. There are 40 Union streets. There are fourteen Chapel streets, three of which are in the borough of Westminster, so that a letter to No. 1 Chapel street, Westminster, may go to three different people before finding the right one.

The job is to take five years. Perhaps the fellows who invent names for Pullman cars or race horses will help. At any rate we may expect to see three different streets, Sanctions street and other reminders of the current era.—St. Thomas Times-Journal.

New Thrill For Sourdoughs

Two Alaskan sourdoughs who took the hardships of the northland in stride thrilled to the sights of the city in Seattle after 24 years' absence. Frank Speljeljak, jittery at using a telephone and other "newfangled gadgets," expressed doubt he could get his "pard," Pete Mesick, to return to the Yukon. "No, it's not all the new gadgets he likes. He's never seen a peroxide blonde afore."

Trapper Outwits Wolves

By Turning Around Frequently To Stare At Pack

Clayton Mack is undecided whether to assume timber wolves are cowards or blood-thirsty killers.

On a trip through the Anahim Lake country, 60 miles east of Bella Coola, B.C., the young man was stalking an eagle to obtain feathers for a broom when he spotted a huge black timber wolf. Purring the beast he was surprised when it stopped, sat on its haunches and howled. Presently, many supporters were summoned to the spot.

Being poorly supplied with ammunition, Mack shot only the large black one and another grey running mate. On the return home he outwitted the beasts by turning around frequently and staring at them. Arrival of a horseman eventually put the wolves to rout.

Mack would not say whether the animals were merely curious or inclined to attack. He was satisfied to return safely, rewarded by two fine wolf skins and the bounty on them.

On the birthday of the King of Italy, the Duce reviewed the troops in Rome, made a speech to the populace and called upon the people to rally around the flag. The King cut his own cake.

Tinplate mills of South Wales may be moved to England.

The car to watch is the car behind the car in front of you.

Knit and Purl Your Way to Style

PATTERN 5502

"Lovely," they'll say, when you wear this charming sweater-blouse. Easy-as-A-B-C to make, the pretty shaped yoke is just plain knitting. The bodice, sleeves and collar are a simple stitch in nubby effect, an effective contrast. Sleeves may be long or short. You can have a two-piece dress if you make the plain knitted skirt that comes with it.

In pattern 5502 you will find instructions for making the blouse and skirt in sizes 16-18 and 38-40; an illustration of it and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (cash preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

Says A Shorter Route To Bay Would Be Solution For Any Lack Of Traffic

Our Governor-General

Lord Tweedsmuir Will Be Continued To Be Known As A Writer

Perhaps it was in a forgetful moment to afflict young brides that His Excellency signed himself as John Buchanan when he visited Montreal the other day. But up to the present we are quite sure that the autograph hunter will treasure the signature "John Buchanan" more highly than "Tweedsmuir."

But Lord Tweedsmuir is a little more fortunate than most newly created peers inasmuch as the name by which he will continue to be known in his capacity of a writer; for that he will continue to write we are not doubt; a writer who is compelled to write for a living we can imagine, would be glad enough to lay the pen aside for a season, but John Buchanan says he writes books because he likes doing it.

And so the world will be doubly favored. Its letters will continue to be enriched by the works of the celebrated author, John Buchanan. Public life, no doubt in due season, will be stimulated by the return of an old and valued servant under a new name. John Buchanan that was. Society will be graced and charmed by the presence of Lord and Lady Tweedsmuir.

We are not contemptuous of titles (although we have opinions regarding some of the people other than Lord Tweedsmuir, on whom they are bestowed), but we are glad to know His Excellency signed for that Montreal autograph hunter the name by which he is known. One feels that he is abundant. Mr. Layet foresees that perhaps he has even been a bit of an autograph hunter himself in his day, and felt that the collector will place more value on the signature of a great author than that even of a governor-general.—Vancouver Province.

Wages War Against Insects

Dominion Entomologist Continually Fighting World's Most Costly Enemy

Dr. Arthur Gibson, L.L.D., of Ottawa, has spent the last 35 years fighting a war to the finish with the world's most costly enemy. With some 65 officers in his "army," he is attempting to hold back a force that damages Canadian property to the extent of \$150,000,000 every year. Dr. Gibson is the Dominion entomologist, and his war is against insects.

He is 60 years old, tall and thin, and remarkably happy for a man who has 30,000 separate specimens of insect life arrayed against him. But insects in themselves never worried him. In fact, ever since boyhood he has rather liked them, and if it were not for their billion-dollar destruction habits he would probably be content to study them in his many glass cases. As it is, he asks and gives no quarter.

Insect pests, according to Dr. Gibson, would destroy mankind in less than a year if scientists relented in their battle. Even now, when governments are spending millions of dollars annually, the insects succeed in destroying more than 10 per cent. of all foodstuffs grown.—Toronto Star Weekly.

Was Once Outlawed

Puritans Of 1659 Branded Christmas Spirit As Pagan

The Christmas spirit was traced back in history and identified as a one-time "public enemy."

Branded a pagan outlaw, it was banished from New England by the Puritans in 1659.

Yule gaily and feasting so irked those solemn pillars of the church, declared Prof. William Warren Sweet, University of Chicago church historian, that they passed a law in the general court of the Colony of Massachusetts saying:

"Whosoever shall be found observing any such day as Christmas or the like, either for forebearing of labor, feasting, or any other way, as a festival, shall be fined five shillings."

May Prove Important

The Winnipeg Free Press says two local inventors have succeeded in producing a gasifier for automobiles which, they claim, will increase the efficiency of the internal combustion engine by 100 per cent. If it tests prove this to be the case, it is one of the most important inventions of this decade.

Embedded In Tree

A rusty horseshoe was found embedded near the heart of a white elm tree at Beatrice, Nebraska, by J. W. Burks, 95, who has preserved a section of the tree containing the oddity. Burks recalls the shoe was hung on the tree when it was a sapling about as thick as his wrist. He planted the tree in 1852.

We get out of marriage just about what we put into it.

A railroad running almost due north from Winnipeg, cutting 335 miles off the present circuitous route to Churchill, is the answer to lack of traffic over the Hudson Bay route.

In the opinion of one of the first proponents of western Canada's short cuts to Europe.

The proposed road, as envisioned by H. L. Layet, vice-president of the On-to-the-Bay Association, would provide a direct outlet for agricultural Manitoba, cutting to 663 miles the present 998-mile rail haul from Winnipeg to Manitoba's seaport.

Work would be given thousands of men and a vast area of valuable lands opened up.

The requirements of 10,000,000 people in eight states south of the international boundary would assure a tremendous volume of incoming freight, he believes, traffic not now available because of the wide swing to the west of the existing Hudson Bay railway.

Only eight vessels docked at Churchill in 1935. They carried to Europe 2,402,000 bushels of wheat. Last year, 15 boats put in, clearing with 4,000,000 bushels of wheat, 580 head of cattle, 2,000,000 lbs. of lumber and other goods. Varied cargoes were brought in. Only one steamer docked with cargo this year.

First talked of three years ago, the proposed 362-mile road could be built at a cost of \$5,000,000, Mr. Layet said. It would run on the east side of Lake Winnipeg to Gillam, 183 miles from Churchill and at present a divisional point on the Hudson Bay railway.

The line would cut through undeveloped mining and timber lands, country where hydro-electric power sites abound. Mr. Layet foresees capital pouring into the province to develop the area. When the road is completed, the workers could settle on farms, assured of markets easy of access.

He visualized Gillam as the Pittsburg of Canada, from which steel would be shipped to all parts of the Dominion. Within reach are billions of tons of iron ore. Nearby is almost unlimited electric power to operate the giant smelters which Mr. Layet believes some day will be built.

Government surveys have shown great stores of ore exist on the Hudson Bay side of the east side of Belcher Bay. This could be brought by boat and rail to Gillam at little cost. Some day—not this year, he thinks—Gillam will be a great industrial city, the metropolis of the north.

Netherland's Queen Welthy

Has Had Longest Reign Of Any Sovereign Living

Queen Wilhelmina of the Netherlands, a recent birthday celebrant, is not only the world's senior sovereign (in length of reign) but one of the wealthiest women as well. Now at 55 she is a widow and the mother of a daughter who is heir to the throne.

She is a pious Calvinist, dignified and Victorian in her tastes. Fashion interests her not a bit, and life in her palaces is sober and almost frugal despite the fact she has an income of at least five million dollars annually. The Dutch people are serious, sane, careful, wise and hard working. She examines every state paper and is said to read every scientific book of importance dealing with her kingdom.

She enjoys sketching in the country and frequently bicycles with her daughter, Princess Juliana, whose life is considerably restricted by her monarch-mother. Queen Wilhelmina ascended the throne in 1898 when she was 18 and in 1901 married Dr. Henry of Mecklenburg-Schwerin. Eight years later the princess was born and last year Prince Henry died.

Mysterious Radio Signals

Giving Trouble To Short Wave Sets At Points All Over The World

Radio technicians speeded up efforts to determine the source of a mysterious signal audible in short-wave receivers at numerous points all over the world and strong enough at times to disrupt commercial traffic.

Word reached marine department officials that the signal, constant in nature and resembling a low power hum, had been heard as far away as India and in such widely-scattered points as Louisville, N.B.; Herschel Island, in the western Arctic; England; Labrador and the North American Atlantic seaboard generally.

The marine department said as far as it could determine the signal originated in a westerly direction from Ottawa and in a high latitude, that is far north of the Equator.

London Is Friendly City

London is a gold mine of friendship, says G. Noel Eade, Secretary of the International Friendship League, who declares the metropolis is becoming the most hospitable city in the world to young people.

One way to make friends is not to give them away.

HAWKS CAPTURE OPENING GAME OF PEE-WEES

Last Thursday night the Pee-Wee hockey team made their debut on the ice and gave a good account of themselves. The game proved that the teams are evenly matched as the score was close in both games. The Maple Leafs and Blackhaws were the first to take the ice and display their ability as puck-chasers, the Hawks steering it into the net four times to the Leafs three. The scorers for the Hawks were Todd 2, McNeice and Lamont, while Danner 2, and Jones scored for the Leafs.

In the second encounter, between Tigers and Rangers, the Rangers emerged winners 3 to 2. Roberts scored all three goals for the winners, and Ferrel and Ford for the losers.

On Saturday morning the boys all got to the rink bright and early ready for their second tussle, and quickly donned the pads and skates. The first two teams to clash were the Leafs and Rangers, this game was a ding-dong struggle from start to finish, ending in a 2-2 tie. For the Rangers Scott and Roberts did the scoring, and for the Leafs, Webster and Danner.

The Hawks and Tigers, who had been anxiously waiting, played in the second game and the vicious scorers of the Hawks were more than the angry Tigers could stand, the Hawks notching three, counters to the Tigers one. Layton 2 and Todd were the marksmen for the Hawks and Hoppus for the Tigers.

Wetaskiwin Wins By 5-2 Score

(Continued from Page One)

beat. Lacombe continued to have the best of the play when the bell rang closing the first period with no score.

The second period started with considerable mid-ice play, and close checking on both sides, when Hayes

was penalized, and Lacombe pressed with five men up. While his team was a man short Spencer grabbed a loose puck and broke fast with McMurdo, placing the puck past Craigen for the first score of the game. Spencer was checked hard by Pettit, and the play was stopped while he recovered. Wetaskiwin continued to press, and in a nice combination play Morrison scored from Medlik, putting them 2 up. This reverse spurred on the locals, and the crowd roared when Pettit, receiving a well laid down pass from Penman scored for Lacombe.

The goalies were both having close calls at each end, and in stopping a hot shot from Spencer, Craigen received a bad cut over the left eye. The game was stopped while he went off for repairs.

After Craigen returned the visitors pressed hard and Spencer scored unassisted, on a rebound shot. Pettit broke up a rush and shot wide from the blue line. Shortly after Gleason was brought to his knees to save a hot one from McGregor, and the second period ended.

The third period started with Lacombe battling to tie the score. The visitors pressed hard and Craigen did yeoman work in keeping them from scoring. In a pretty combination play McMurdo scored from McLaughlin, and Wetaskiwin led 4 to 1. Penman stickkanded his way through, but his pass went astray, and Lacombe applied the pressure. Gleason, however, was wonderfully cool in goal and blocked successive shots which were peppered at him. Lacombe was working the power play with five men up when McMurdo broke fast with Spencer, and placed the puck behind Craigen to score. Not to be outdone Lacombe hemmed the visitors back in their own territory, and McGregor finally scored from Simituk. Morrison was penalized and the local team worked to hang play again, but could not beat Gleason. The bell rang and the game was over, with Lacombe having the breaks of the game against them, although Wetaskiwin were entitled to the win.

The Hawks and Tigers, who had been anxiously waiting, played in the second game and the vicious scorers of the Hawks were more than the angry Tigers could stand, the Hawks notching three, counters to the Tigers one. Layton 2 and Todd were the marksmen for the Hawks and Hoppus for the Tigers.

The second period started with considerable mid-ice play, and close checking on both sides, when Hayes

was penalized, and Lacombe pressed with five men up. While his team was a man short Spencer grabbed a loose puck and broke fast with McMurdo, placing the puck past Craigen for the first score of the game. Spencer was checked hard by Pettit, and the play was stopped while he recovered. Wetaskiwin continued to press, and in a nice combination play Morrison scored from Medlik, putting them 2 up. This reverse spurred on the locals, and the crowd roared when Pettit, receiving a well laid down pass from Penman scored for Lacombe.

The goalies were both having close calls at each end, and in stopping a hot shot from Spencer, Craigen received a bad cut over the left eye. The game was stopped while he went off for repairs.

After Craigen returned the visitors pressed hard and Spencer scored unassisted, on a rebound shot. Pettit broke up a rush and shot wide from the blue line. Shortly after Gleason was brought to his knees to save a hot one from McGregor, and the second period ended.

The third period started with Lacombe battling to tie the score. The visitors pressed hard and Craigen did yeoman work in keeping them from scoring. In a pretty combination play McMurdo scored from McLaughlin, and Wetaskiwin led 4 to 1. Penman stickkanded his way through, but his pass went astray, and Lacombe applied the pressure. Gleason, however, was wonderfully cool in goal and blocked successive shots which were peppered at him. Lacombe was working the power play with five men up when McMurdo broke fast with Spencer, and placed the puck behind Craigen to score. Not to be outdone Lacombe hemmed the visitors back in their own territory, and McGregor finally scored from Simituk. Morrison was penalized and the local team worked to hang play again, but could not beat Gleason. The bell rang and the game was over, with Lacombe having the breaks of the game against them, although Wetaskiwin were entitled to the win.

The Hawks and Tigers, who had been anxiously waiting, played in the second game and the vicious scorers of the Hawks were more than the angry Tigers could stand, the Hawks notching three, counters to the Tigers one. Layton 2 and Todd were the marksmen for the Hawks and Hoppus for the Tigers.

Spruceville

SPRUCVILLE, Jan. 14.—Last Tuesday night Mr. and Mrs. Hugg entertained a number of their friends at an evening spent in games and cards.

Wednesday afternoon the ladies of the Spruceville district presented Mrs. English with a little souvenir of her stay in the district. Mrs. L. Young was the hostess at this pleasant social function.

Wednesday evening there was a special joint meeting of the U.F.A. and U.F.W.A. to discuss the resolutions to be put before the convention. The meeting was held at Mr. and Mrs. Nelson Hall, and was well attended. Lively interest was displayed.

Friday saw the opening of the new Dutch Reform Church. The afternoon opening service was in Dutch. In the evening the proceedings were in English, and many visitors were present.

Mr. and Mrs. Proudfoot entertained a number of their friends to dinner Friday evening.

Mrs. Heath (senior) is visiting in Lacombe with Mrs. Jones.

Miss Esther Hug was taken ill Monday night and Dr. Locke advised her removal to hospital.

Mrs. Nelson Hall is visiting with her mother Mrs. W. W. Burton.

There will be a dance at Spruceville Hall, Friday, Jan. 17. The U.F.W.A. will be in charge of the lunch. Mr. John Morter, an old timer in these parts, is seriously ill in hospital, we are sorry to learn.

Tuesday afternoon, Jan. 14, the Spruceville Mutual Telephone Co. held their annual meeting. The company affairs were shown to be in excellent condition and those present evinced a lively interest in the affairs of the company. The board was re-elected in toto, and the executive officers were re-appointed. It is regretted that there was not a larger turn-out of the members.

The Woody Nook School Meeting last Saturday brought out a fair attendance and there was much interesting discussion. Mr. Heath was re-elected to the board. The school board, at the request of the electors, is going to equip the school with a piano.

Lacombe Juniors Defeat Rimbey 4-3

Lacombe Junior hockey team won a closely contested game at Rimbey on Thursday, January 9, the score being 4-3 in their favor. W. R. Hoag in the Rimbey goal received painful injuries when he was struck in the face with the puck. Hoag was replaced by A. Paffreyman during the last period. Frizzell and Carter were the leading point-getters with three each. A return game will be arranged in the near future.

DEFEAT RED DEER 10-2

The Red Deer juvenile hockey boys consented to fill an open date here in an exhibition game Tuesday night with our Junior White Wings, the score ending 10-2 for the local team. Ken Brosh of Red Deer tended goal for the juniors and will fill this position for the remainder of the season. A return game will be played next week.

First period: (1) Red Deer, Sharman (Low-Hay); (2) Lacombe, Frizzell (Clift); (3) Lacombe, Hoppus (Frizzell). Penalty, Clift.

Second period: (4) L. Clift; (5) L. Carter (Roberts); (6) Clift; (7) L. Hoppus; (8) L. Carter. Penalty, Brooks.

Third period: (9) L. Frizzell (Perkins); (10) L. Hoppus (Roberts); (11) L. Frizzell (Clift); (12) Red Deer, Martin (Kudson).

Referee—Tom Carruthers.

ANNUAL HOSPITAL MEETING

The annual meeting of the Lacombe General Hospital will be held in the offices of Fraser and Macdonald, Tuesday, January 21st, at 4 p.m.

ANNUAL MEETING

The Annual Meeting of Spruceville S.D. No. 361 will be held in Spruceville School on Saturday, Jan. 25, 1936, at 2 p.m. Sealed tenders for twenty racks of sheep, split poplar wood, 14 inches high, will be received up to the close of the Annual Meeting, word to be delivered and piled in School yard by March 15, 1936.

(Signed) LIZZIE BURTON, Secretary.

Rimbey

RIMBEY, Jan. 13.—The U.F.A. held its annual meeting Saturday, Jan. 11, at the home of Mr. and Mrs. T. A. Diddings. The full slate of officers were returned for the ensuing year: Mrs. W. S. Mellis, president; M. S. Auger, vice-president; George Grinde, secretary-treasurer. T. A. Diddings was chosen as delegate to the convention to be held in Edmonton; L. D. Taylor as alternate.

The Rosedale U.F.W.A. is scheduled to meet at the home of Mr. and Mrs. Robert McKenzie on January 23, when it will be decided whether the organization continue as a U.F.W.A. or become a community club.

Several cases of scarlet fever have been reported in the Lacombe district. Mrs. G. D. Young returned to Rimbey on Friday from Calgary where she had spent several days the guest of her parents, Mr. and Mrs. J. H. Cook. Friends of Mrs. Cook will be pleased to learn that she is much improved from her recent illness.

Miss Margaret Sibbald returned to Calgary on Thursday, Jan. 9, to resume her studies at Garbutt's Business College.

Bert Lundberg of the staff of the Central Creameries, Ltd., Rimbey, has been transferred to Innisfail for several weeks. Mrs. Lundberg accompanied him as far as Red Deer, where she will be the guest of her parents, Mr. and Mrs. R. Jones.

Pupils of the United Church Sunday School at Rimbey were delighted

fully entertained on Friday, Jan. 10, by their teachers. Games and numbers were presented by the rhythm band under the direction of Mrs. D. Kennedy, A.T.C.M.

Mrs. M. S. Auger, who has been ill at her home northeast of Rimbey for several weeks, is reported as somewhat improved.

Shirley MacDonald, seven-year-old daughter of Mr. and Mrs. A. B. MacDonald, is convalescing in St. Paul's hospital, following an operation for appendicitis.

The Blindman Valley Livestock Association shipped a carload of cattle from Rimbey on January 13, and 181 head of hogs on January 8.

A. Dawson of Calgary has been in the Rimbey district buying livestock this week and shipped cattle on January 14 from the Rimbey, Bessley and Forshee loading platform.

TOLEDO.—The sight of a 76-year-old woman trudging behind a pushcart on a cold, rainy day was too much for Police Chief Ward Taylor. He bought her shoes and rubbers.

Tenders Wanted For Putting Up Ice

Sealed tenders will be received by the undersigned for putting up 60 tons of ice, more or less, and packing in sawdust; also for putting up 60 tons more or less in cold storage, to be packed tight and chinked.

The tenders to be based on price per ton.

Tenders to close at 6 o'clock, Saturday, Jan. 25, 1936.

The lowest or any tender not necessarily accepted.

Mark "Tender for Ice" on outside of Envelope.
